PRECISE MOLD & PLATE EARNS PLASTICS INDUSTRY HONOR

Precise Mold & Plate was Named #2 Best Place to Work in North America by Plastics News. This was the first time Precise participated in this prestigious program.

Columbus, IN: Plastic injection mold maker Precise Mold & Plate was recently named #2 Best Place to Work by the international trade publication Plastics News.

The Best Places to Work program was designed to identify, recognize and honor the best employers in the plastics industry, benefiting the economy, workforce, and businesses in the United States and Canada. 15 companies were named to this year's list.

"We are extremely honored by this award," says Don Dumoulin, CEO / Owner. Our talented craftsmen continue to show tremendous commitment to customer satisfaction. I am very proud of our team."

Plastics processors and injection mold makers across North America entered the two-part survey process to determine *Plastics News* Best Places to Work. The first part consisted of evaluating each nominated company's workplace policies, practices, philosophy, systems, and demographics. The second part consisted of a confidential employee survey to measure the employee experience. The combined scores determined the top companies and the final ranking. Best Companies Group administered the overall registration and survey process, analyzed the data, and determined the final rankings.

This was the first year Precise Mold & Plate entered the Best Places to Work program. Several themes from the random employee surveys factored into Precise earning the #2 spot, including:

- History of high customer satisfaction scores
- Ongoing investment in advanced precision machining
- Vibrant yet managed growth

Plastics News honored all the winners and revealed final company rankings in a special ceremony at the 20th annual Executive Forum on February 16 in Naples, FL. Company profiles and final rankings of the 15 winners will be published in the March 21 edition of *Plastics News*.
