

## POWERFUL PERFORMANCE:

- **Linux based operating system:** robust and stable.
- **Greater savings:** requires minimal power to operate.
- **MySQL:** for easy recovery.
- **Double Hard Disk:** one dedicated to operating system and one for data collection.
- **Interactive documentation**
- **Auto-description pop-up:** for advanced warning along with a list of actions for troubleshooting right from the start.
- **Flexible date storage:** daily report generation with guaranteed 1-year data storage and extendable up to 5 years.

## USER-FRIENDLY DEVICE:

- It's as easy as using your very own smart phone!
- **Timesaving:** personalized for each operator and faster to use
- **Flexibility:** with easy upgrading and downloading of apps
- **Intuitive icons:** similar and familiar like the smart phone icons.

We are committed to our stake holders, right from persons that operate our machines to end users whose packaging is double-checked, thanks to our machines. As a result, we present BEYOND HMI, the new Human-Machine Interface by Bonfiglioli Engineering, dedicated to transforming and simplifying packaging integrity inspection tasks for all operators that work with our machines. Packaging Inspection has never been so user-friendly!

## FEATURING:

- Smart phone-like intuitive and user-friendly touch-screen display
- Personalized screen for each operator.
- Apps and widgets with drag & drop option.
- Fixed bar on bottom menu of control panel.
- Active Directory: an option for interfacing with customer's security access network.
- Linux based operating system.
- Vertical & Horizontal portrait display for adaptability and ease of use.
