

SIMPLIFYING THE JOURNEY TO MULTICLOUD WITH CLOUD GATEWAY

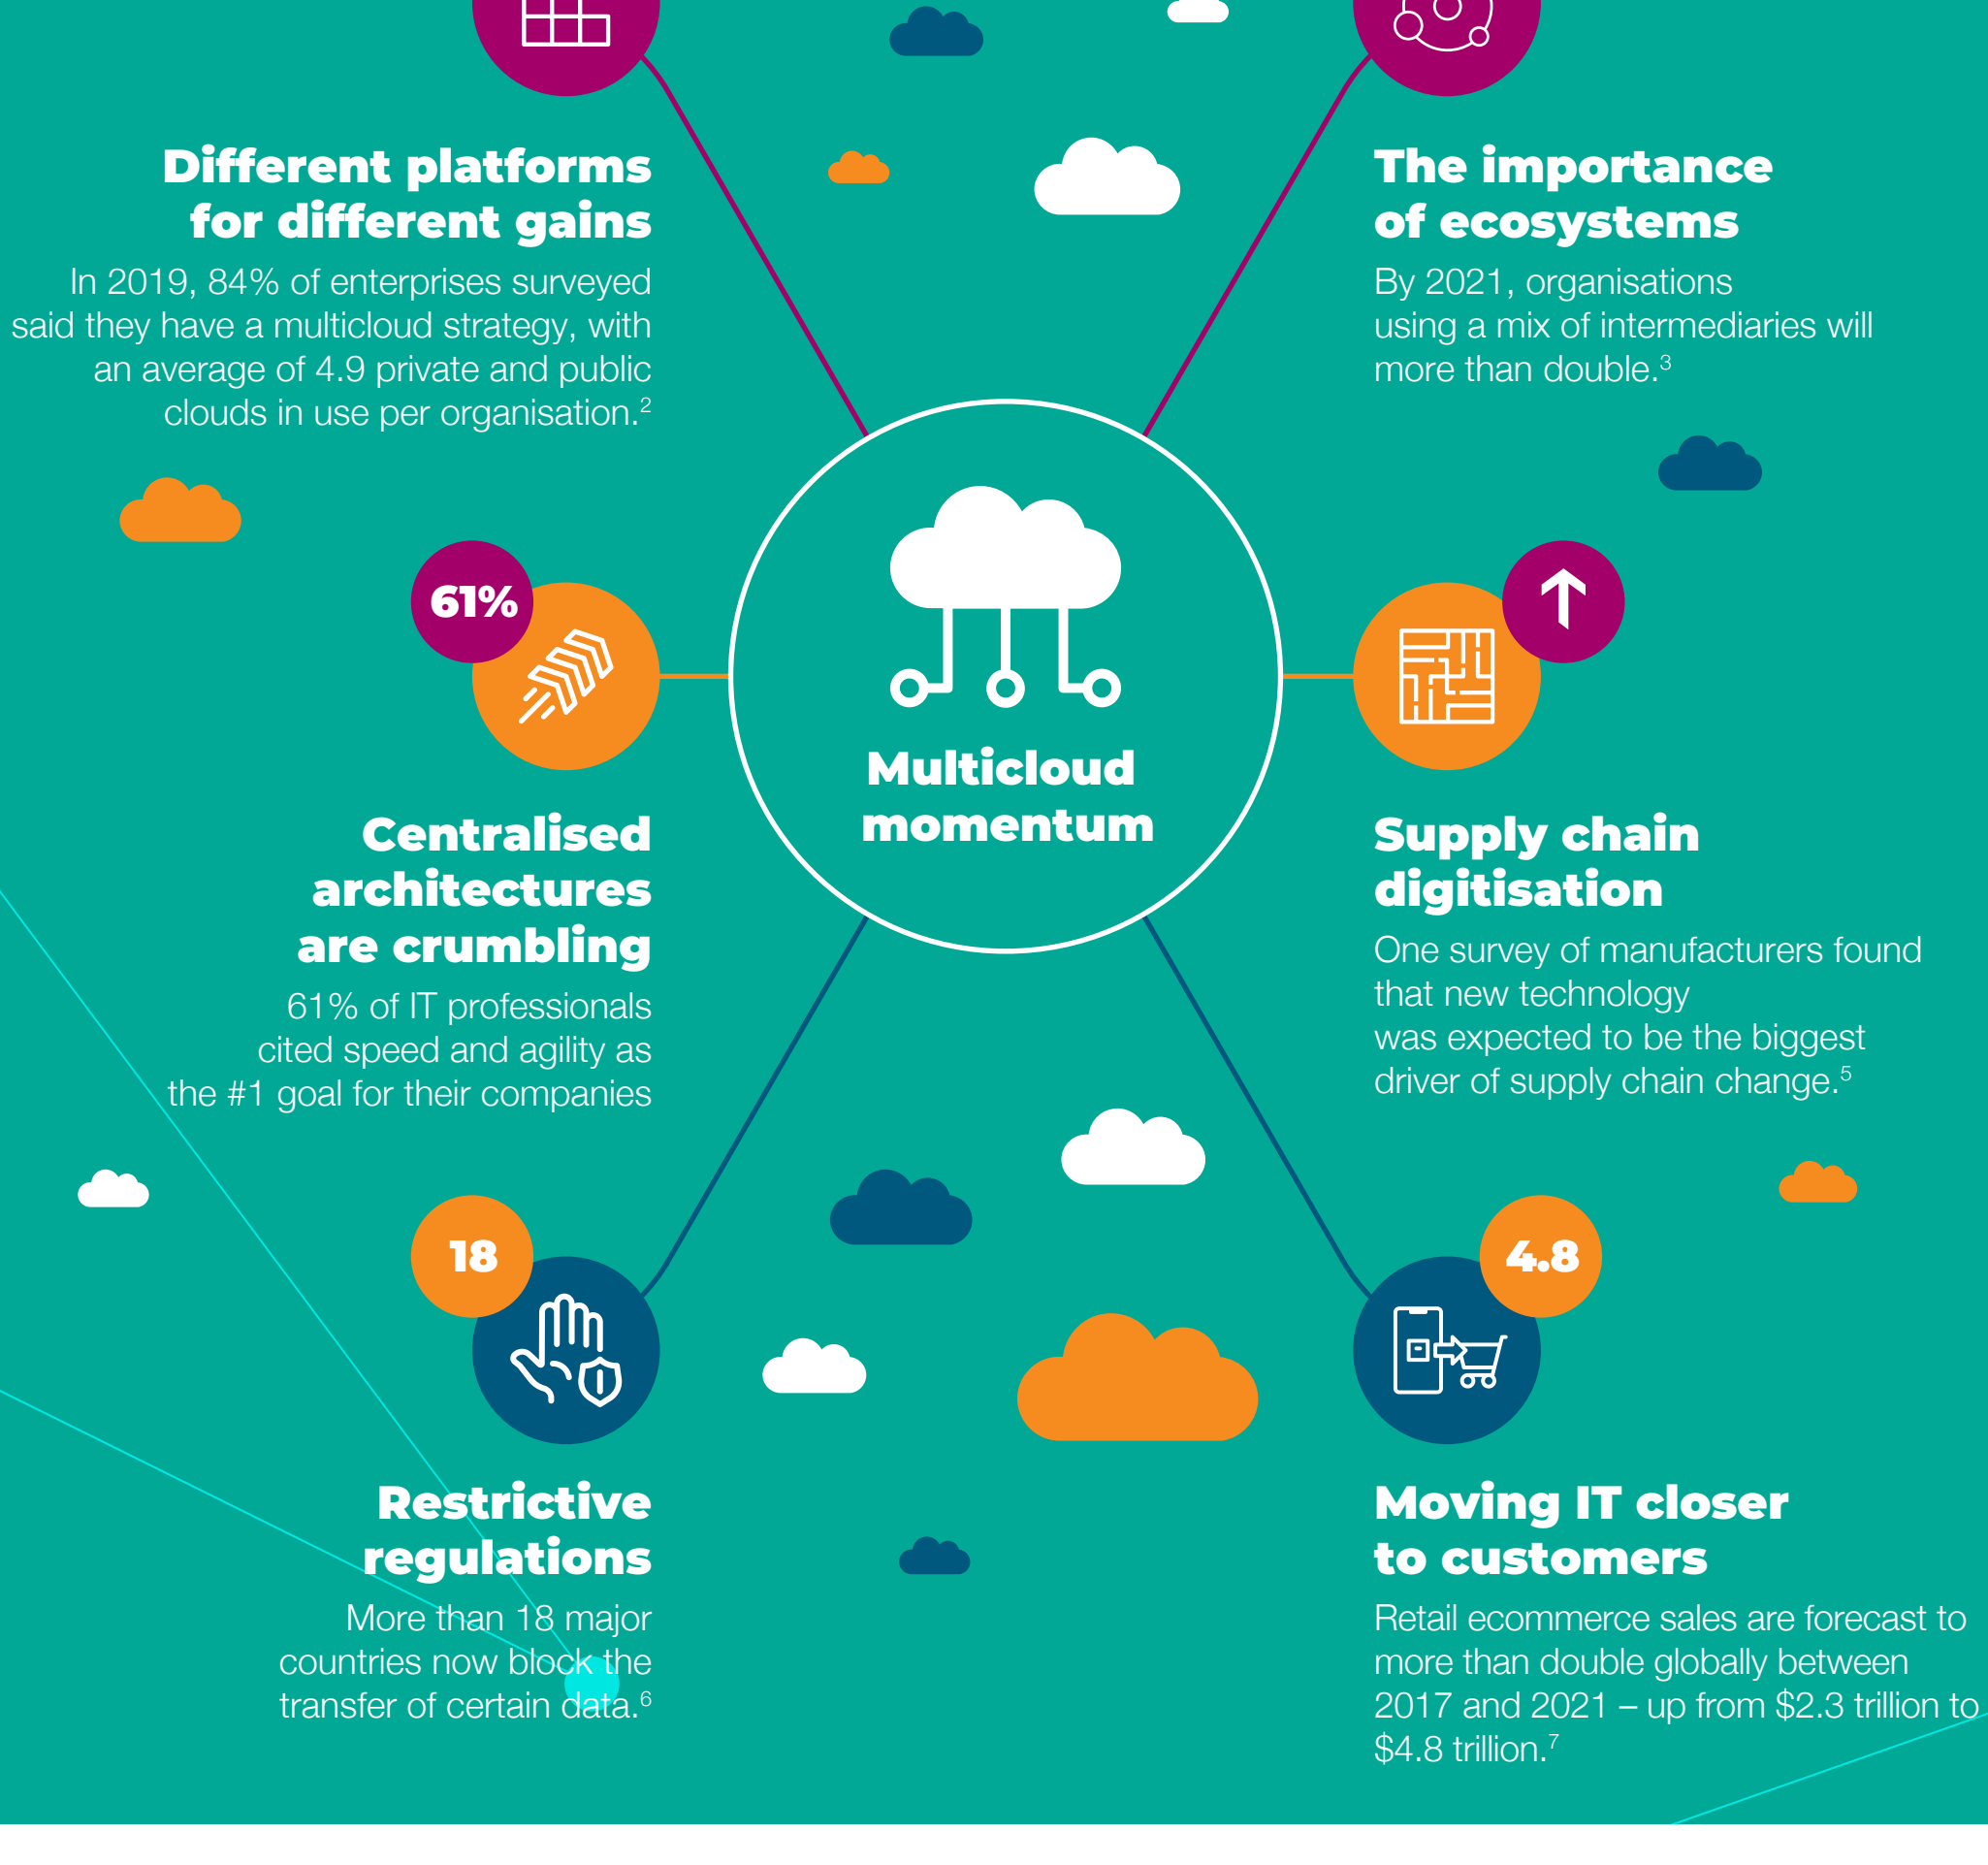

By **2021** at least **50%** of

GLOBAL GDP WILL BE DIGITISED,

with growth in every industry driven by digitally enhanced offerings, operations and relationships.¹

As enterprises seek to respond to the opportunities presented by the digital economy – and support new, real-time interactions between people, locations and data – traditional on-premise infrastructures are failing to deliver.

A number of factors are driving the move away from traditional infrastructures

There are a number of challenges businesses face when transitioning to multicloud

Enterprise consumption of Interconnection Bandwidth is forecast to experience

Enterprises connecting to cloud and IT services providers is the fastest growing category of Interconnection, forecast to grow at 98% CAGR

7x growth by 2021⁸

98% CAGR through to 2021⁹

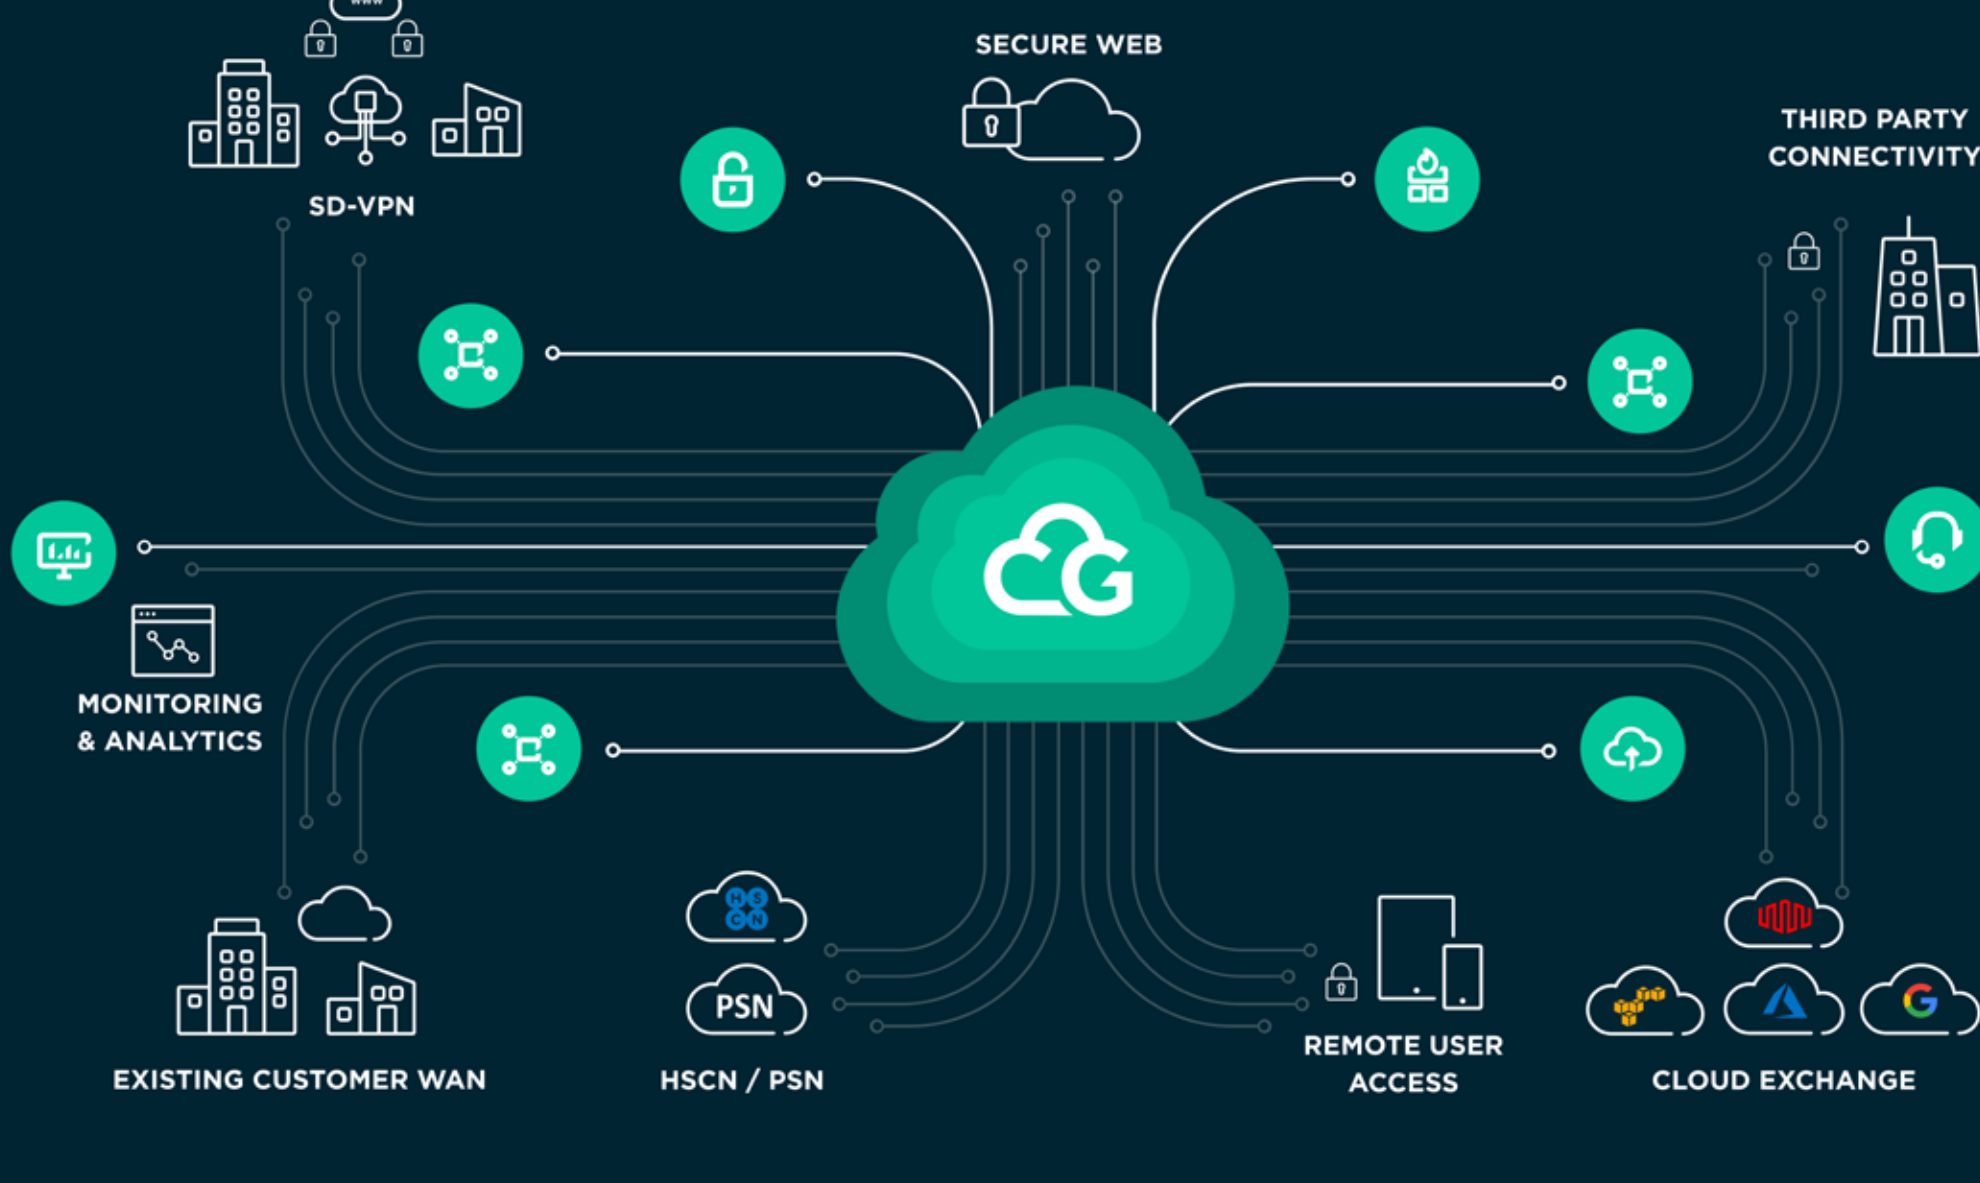

Why Interconnection has the answers

Interconnection is key to overcoming the challenges of migrating to a distributed, multicloud architecture, simplifying the journey and providing an essential building block of the global digital economy.

The advantages of interconnection are:

- Private, secure and fast connections**: Private, secure and fast connections to multiple cloud providers.
- Minimised risk**: Control of all business communication through traffic exchange points.
- Better quality, higher speeds**: Direct, dedicated connections to public cloud platforms, with speeds up to 10Gb.
- Simplified management**: A single interface accessed via a single port that is connected to multiple cloud providers.
- Improved performance, reduced cost**: Private networks to meet the needs of distributed user communities, improving performance and reducing costs.
- Easy workload and data movement**: Easy, quick and secure movement of workloads and data between cloud platforms.

THE CLOUD GATEWAY ECOSYSTEM

Cloud Gateway: unlocking the power of multicloud
By leveraging the power of Platform Equinix™, Cloud Gateway equips you to overcome the challenges associated with multicloud, ensuring that you can realise the full potential of a distributed IT infrastructure.

Platform Equinix™: the world's leading Interconnection platform
The world's leading cloud Interconnection platform, Platform Equinix™ has been used by thousands of enterprises to simplify their journey to multicloud.

Cloud Gateway PRISM is a hybrid-cloud connectivity PaaS, designed to make it simpler and easier for organisations to consume cloud services, and to migrate legacy applications to the cloud without being constrained by incumbent vendors or technology.

- It delivers:**
- Direct
 - Secure
 - High-speed
 - Low-latency

CALL OR EMAIL US AT:

Connectivity to all of the world's major cloud providers. 2,500+ cloud providers reside within Equinix facilities.
