

ATTN: Healthcare Workers  
INTRODUCING  
ADITXTSCORE™  
FOR COVID-19

AditxtScore™ immune monitoring provides meaningful information to help evaluate one's personal immunity status to COVID-19.

**Don't guess—KNOW you're protected.**

## WHAT'S MY SCORE?

- » Is there evidence of prior exposure to the SARS-CoV-2 virus or vaccine?
- » Do I have natural immunity as a result of the prior infection? If so, for how long?
- » Is there evidence of a robust immune response developed to protect against COVID-19? If so, for how long?

As we move through the next phase of the pandemic that expands availability of COVID vaccines, protective immunity status will be key to returning to normalcy. **The ability for people to discover and evaluate a meaningful view of their immune system** provides the best chance for them to make informed personal health and safety decisions.
