

Empowering an NHS Trust to strengthen governance and efficiency across the whole organization

Background

This NHS organization is one of the largest Teaching Trusts in the UK, with a team of over 9,000 healthcare professionals serving over a million people across two hospitals.

Challenge

Managing projects to achieve the best outcomes for patients and delivering value for money is paramount to the Trust.

The Trust need to be able to share learning and centralize projects, including those for Continuous Improvement and realizing government-mandated quality indicators, amongst others.

Solution

i-nexus provided a 360 view of the entire Trust to align strategy, track benefits, manage resources and risks across clinical and corporate functions, as well as prioritise activities that provide the biggest benefits.

i-nexus has eliminated many inconsistent and unreliable working practices, lists, spreadsheets and KPI tracking approaches.

Benefits

Strategic alignment and safeguarding of transformation goals through centralised governance.

Reduction in project cycle time and robust benefits tracking.

Visual dashboards for project management and quality performance indicators.

“The insights and visibility are already transforming the way we commission projects, bringing consistency, alignment and accountability. Managers can quickly identify and take action across our entire program of activity, making i-nexus essential to improving the way we work, the way we deliver change and the way we operate.”

Associate Director of Engagement & Transformation
