

Priority-Based Budgeting Worksheet

This worksheet is designed to guide your district when creating a priority-based budgeting plan. This resource helps school districts think strategically about the best way to spend public funding to advance the interests of students.

<p>What is one district initiative or special project your team is working on to maximize opportunities for students?</p>	
<p>What outcome do you expect from this project?</p>	
<p>How do you plan on measuring this success?</p>	

Let's discuss the needed resources for your project's successful implementation.

<p>Time</p>	<p>Money</p>	<p>People</p>
<p><i>Timeframe, needed benchmarks, etc.</i></p>	<p><i>What new "stuff" is needed? Any recurring costs?</i></p>	<p><i>Who and what percent of their time is needed for this project?</i></p>
