The ERP Systems & IT Service Provider That Enables You to Focus on Growing Your Business

Atlantic DataSystems

Atlantic DataSystems (ADS) is a leading technology consultancy and provider of enterprise resource planning (ERP) and customer relationship management (CRM) software. As one of the top Sage Business Partners (Sage 300 ERP) in Canada, ADS has over 30 years of experience providing ERP solutions and IT services to growing businesses throughout Canada. With offices in Newfoundland, Nova Scotia, New Brunswick and Ontario, our team of experts is committed to helping growth focused small to midsized businesses leverage technology to achieve their goals.

The ADS Approach

At ADS we believe in the promise of technology. When our ADS team meets with a client, we focus on collaborating to establish direction and set goals. ADS Consultants follow a proven systematic approach when executing engagements. This methodology features a plain language discussion about how Information Technology (IT) aligns with your business' unique situation - so that we understand how you define success.

Phase 1 - Discover

We collaborate to define your current environment and understand your company's unique situation, desired future state and business goals.

Phase 2 - Plan

We analyze the situation to align your project goals with leading edge IT solutions, ensuring that we maximize delivery of business results.

Phase 3 - Build

Our certified Consultants leverage their expertise to create customized solutions and product implementations.

Phase 4 - Deploy

The go-live process involves collaboration and change management with internal and external stakeholders.

Phase 5 - Evaluate

We monitor the results of our implementation, eliminating the concern for you and your company.

ERP and CRM Software Solutions

ADS provides companies that have outgrown their spreadsheets and their small business accounting packages, with software designed specifically for small to midsized businesses, Sage 300 ERP. With Sage 300 ERP, your company is unified with a single, integrated solution to share information across each key business area, providing your company with an easy-to-use, cost-effective and low risk solution that will grow with you.

Sage 300 ERP offers you the flexibility to build the best possible solution for your business by giving you control to use only the functionality you need today. Your system can grow as your business grows, allowing you to only add and pay for modules that you need. Some of these key areas of functionality include:

Functionality

- Accounting and Financial Management
- Operations and Distribution Management
- Services and Project Management
- Payroll Management
- Multi company and Global Operations
- Customer Relationship Management (CRM)
- Fixed Assets
- Business Intelligence and Reporting
- Human Resource Management

See Your Business from a New Perspective

With full visibility across your business to access accurate and real-time information, ADS clients can expect to see:

- Reduced Cost
- Reduced Financial Risk
- Reduced IT Complexity
- Increased Efficiency
- Increased Business Value
- Increased Return on Investment (ROI)

"Sage 300 ERP offers an easy-to-use, cost-effective and low risk solution that grows with your company."

Managed IT Solutions

Small to midsized businesses experiencing growing pains are often faced with the reality that they simply do not have the resources, or the expertise to meet every IT need with an internal IT department. If you are struggling to keep up with changing technologies and infrastructure maintenance, it's time to consider another option. ADS will work with your team to ensure your IT solutions are worry-free.

ADS can help fill any of your IT resource gaps with our highly experienced technical experts. Wherever and whenever you need help - we're ready to provide it. Stop wasting your time on mundane tasks and worrying about technology and start focusing on growing your business. As a supplement to your IT department or with a complete managed solution, ADS can guarantee that your business will be protected and supported.

As competitive dynamics shift, ADS can help your business map its path to the cloud. Whether you're just getting started with your cloud strategy or wondering how you can exploit the full potential of the cloud – ADS has the answers. Our team of expert Consultants will work with you to help make informed strategic decisions that make the most of emerging technologies securely and reliably.

iSupport

Our iSupport service monitors your network servers and infrastructure to make sure that your business operations are supported and protected. iSupport performs secure, comprehensive scans of your environment by tapping into your server's technical alerts for real-time information. Our iSupport experts will manage these IT assets to minimize interruptions and downtime.

Our iSupport team is committed to delivering a premium level of client support that is founded on consistent and predictable service which includes Monitoring & Alerts; Asset Management; Security Assurance; Preventative Maintenance and Reporting.
