

Ronald Brockmann
CTO

Ronald is responsible for technology innovation for ActiveVideo. He is an industry leader in the creation of virtualized, cloud-based solutions, and has been at the forefront of anticipating how HTML5 and the cloud enable consistent user experiences across any connected device. Most recently, Ronald spearheaded the development of ActiveVideo AppCloud - combining the power, independence, and diversity of the Android ecosystem with ActiveVideo's industry leading virtualization technology and experience.

Ronald joined ActiveVideo in 2009 following the company's acquisition of Avinity Systems, a leading developer of cloud-based platforms. As CEO and co-founder of Avinity, Ronald led a team that enabled rich interactive experiences across a wide range of devices, from low-power digital set-top boxes to CI Plus enabled TVs.

Previously, Ronald pioneered WiFi technologies and contributed to several key IEEE 802.11 standards as CTO and co-founder of No Wires Needed, which was acquired by Intersil in 2000 and ultimately became part of Conexant Systems. Ronald earned an M.Sc. in Computer Science from the University of Twente in Enschede, The Netherlands. He is the holder of several patents.
