Get to Know Stibo Systems

It all began more than 200 years ago in Aarhus, Denmark. From the very beginning, we’ve had a vision for the future that’s lead to a history of innovation.

Stibo Systems believes the future of business requires a Digital Business Core™ of operational data that is continuously shaped and delivered to where it can drive superior business outcomes. It has always been our true passion to work with forward-thinking organizations, to connect information and people, so they can confidently realize success in every era of business.

The average tenure of our leadership and our employees is more than 10 years. This allows us to maintain and provide a high degree of knowledge and expertise about our products and services.

Business-first Mindset

We’re powering business users to shape their future by managing outcomes, not IT plumbing.

We’ve shifted to a Business-first mindset so you can easily create a Digital Business Core of operational data so you can connect and deliver information to every point where it drives your business.

Your Digital Business Core is a combination of our business-first technology, your business-specific requirements and governance, and your operational data. This ensures your information is available when you want it, how you want it and where you want it.

- Act confidently and compete using trusted operational information
- Adapt quickly to ever-changing market conditions and operate at the speed of business
- Go beyond with a Digital Business Core for disruptive advantage

Stibo Systems puts your business first, so you can anticipate what’s next.
Your Digital Business Core

- Connect and deliver operational information at every point where it drives business
- Embrace change and usher in the future with an extensible Digital Business Core
- Deliver confidence to your organization by knowing that you will always trust your data
STEP Multidomain MDM

STEP is a Multidomain Master Data Management platform that integrates multiple disparate systems in your company by streamlining the process of aggregating and consolidating information around your products, customers, suppliers, employees, assets and reference data from multiple sources and formats. STEP connects that information to derive actionable insights, and publishes it to backend systems as well as online and offline channels.
Industry Solutions

Stibo Systems has developed industry-specific solutions and best practices that have helped more than 300 companies address their operational information.
Analyst Recognition

**Gartner**

Rated #1 in Customer Satisfaction and highly ranked by Gartner analysts over the past 8 years. Stibo Systems is a Challenger in Gartner’s new ‘Magic Quadrant for MDM’.

Stibo Systems is again recognized as a leader in The Forrester Wave™: Product Information Management Solutions, Q4, 2016 report.

**Forrester**

Stibo Systems has ranked #1 HOT vendor in Ventana Research’s ‘Product Information Management (PIM) Value Index,’ including #1 in customer assurance, for each publication released.

**Ventana Research**

Recognized as a master data management leader in Information Difference’s ‘MDM Landscape Q2 2017’ report.
About Stibo Systems
Stibo Systems believes the future of business requires a Digital Business Core™ of operational data that is continuously shaped and delivered to produce superior business outcomes. Stibo Systems is the driving force behind hundreds of forward-thinking companies around the world who have unlocked the full value of their information; empowering business users to act with confidence in their data, adapt quickly to changing market conditions and go beyond to anticipate what’s next. Stibo Systems is a privately held subsidiary of the Stibo A/S group, originally founded in 1794. Its corporate headquarters is located in Aarhus, Denmark.
