

Capacity with confidence

You're ready to optimize your supply chain by adding a transportation broker to your network. Finding the right one out of a pool of 15,000 can be the tricky part, so it's important to understand how they will handle your shipment.

ATS Logistics has a carrier selection process to ensure you get the service you expect.

Contact a preferred carrier

If an ATS truck is unavailable, ATS Logistics works with one of our top-tier preferred carriers. Your freight will be moved with trusted carriers who have the track records to get the job done right. This capacity is managed through proprietary software that gives ATS Logistics visibility to trucks that other brokers don't have.

1

Load offered to Anderson Trucking Service (ATS) capacity

With direct access to nearly 3,000 trucks and more than 7,000 ATS company-owned trailers — ATS Logistics works to match each load with a truck from our family of companies.

2

Present load to extended carrier network

There's no need to test drive a new carrier. After three decades with brokerage authority — we have a history with tens of thousands of carriers. We'll reference historic data, a 5-Star carrier scale and insights from our past experiences to ensure we find the right truck for the job.

3

Our capacity reach continues

Getting your freight moved is our number one priority. When needed we will leverage top industry tools to find carriers outside of our network. Using a dedicated in-house compliance team — we'll thoroughly vet each carrier to certify they can deliver.

4

Better process, better service

Our selection process reduces the risk of transportation issues, giving you peace of mind that you've chosen the best transportation partner in the industry.
