

Improve Your Decision-making by Leveraging Data Across your Organization

Are you struggling to gain the insights needed to improve your business from your existing business data?

With the HatchWorks team of data experts, it's never been easier or more affordable to solve business problems and uncover new opportunities using data. Now, businesses of all sizes and across all industries can take advantage of big data technologies and easily collect, store, process, analyze, and share their data. HatchWorks can help you see more value in your data by migrating your data to a preferred cloud provider (public or private) then quickly building a front-end for you to start seeing powerful metrics about your business.

Services:

- Predictive Analytics
- Data Modeling
- Data Architecture
- Data Visualization
- Cloud Migration
- Artificial Intelligence

Improve Decision-making by Leveraging Data Across your Organization

HatchWorks' process starts with helping you to define the key metrics needed by your business then migrating your data and prototyping the designed data visualizations. This gives you a tool to build organizational alignment - which saves you both time and money. Once the data is visualized, we start developing your dashboards, choosing to build a fully custom developed interface or utilizing out of the box software tools like Tableau, InVision, Cliq or QuickSights. We will let the requirements, defined by your true business needs, determine the right technology for the project versus pushing certain tools on you, a common practice of most technology services firms. Once key operational metrics are established, we can leverage the untapped power of the data for artificial intelligence and machine learning which is enabled by our data scientists and the intelligence of powerful data tools.

Benefits:

Cost Savings – centralized data collection and governance reduces overall expenditure

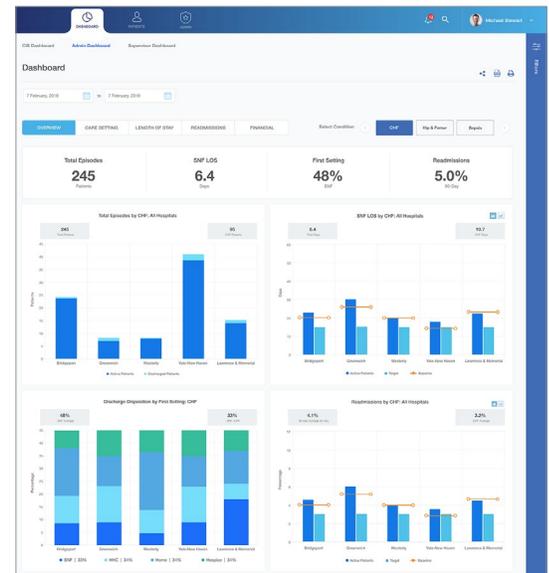

Security - ensures regulatory compliance and security requirements with audit capabilities

Speed to Market - enables teams by increasing data access, scalability and flexibility

Cloud Infrastructure - reliable and low cost cloud infrastructure spurs innovation and adoption

Category	Admissions	Revenue Per Admission	30 Day Post-Discharge Rate	Avg Length of Stay	Community Discharge Rate	Non-Therapy Ancillary Costs	Total Therapy Costs	Details
