Benefits

Identify threats as soon as they occur

Focus on remediation rather than detection

Maximise the benefit of your SIEM investment

Meet compliance needs

SLA - Measurable Escalations

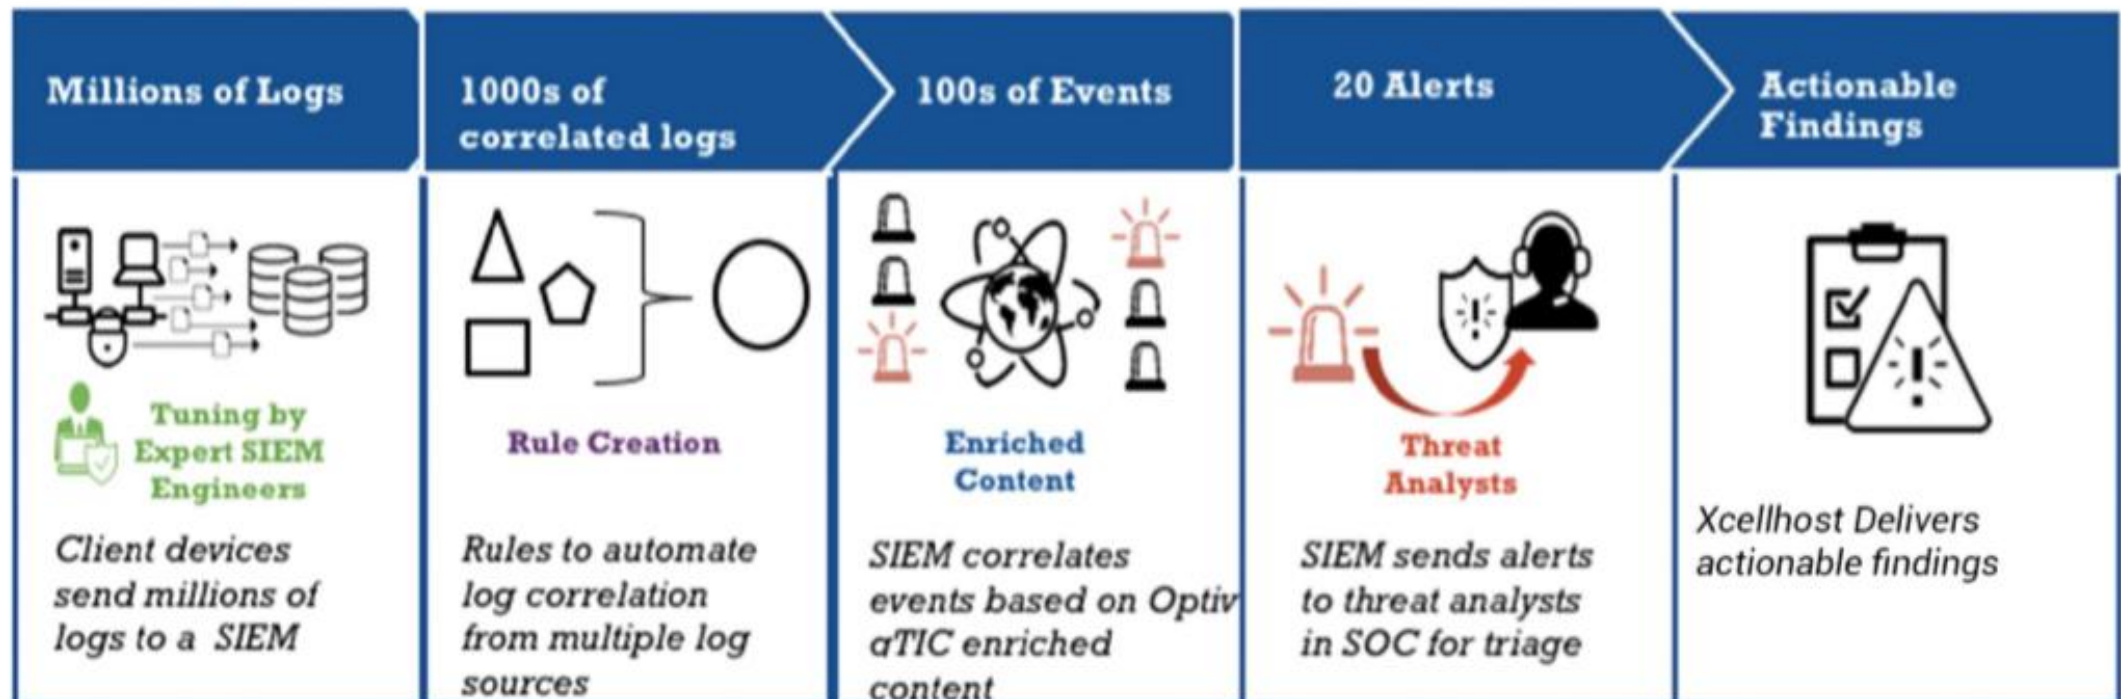

Increased System Health

Service based on ITIL4 framework

As you can see in the flow diagram Below, XcellHost Managed Azure Sentinel is geared towards actionability. This is a continual process of tuning logs & alert data, rules to improve processing, threat correlation and escalation, with research & response for the client for prioritized events and incidents.
