

Cloud Endpoint Security (Detection & Response)

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

Preventing The Unknown & Catching The Known Next Generation Threats & Ransomware

Stop Advanced Threats, Stay ahead of attackers with Adaptive, Layered Endpoint Security & Unique EDR

PREVENTION | MITIGATION | TRUE RESILIENCE

Starting @ ₹ 199 /mo /user

Features & Benefits

Traffic-based Malware Blocking (HIPS)

Exploit & Dropper Blocking (HIPS)

Unique Threat Prevention

Attack Forensics & Source Identifier (IOAs, IOCs)

Threat Hunting (EDR)

Multi-layered, AI Powered Protection

Patch Management

Blocks Data Leakage

Browser-based Protection

Traffic-based Malware Detection (HIDS, IOAs, IOCs)

Phishing Protection & Firewall Integration

Next-Gen Antivirus

Local Signature / File-based Scanning

Real-time Cloud Scanning

Sandbox & Backdoor Inspection

Process / Behavior-Based Scanning

Lightweight Installation & Smooth Performance

Very Easy To Use

Use Cases

Block Ransomware

Advanced Threat Protection

Exploit prevention- Zero day Vulnerability

Data Center Security

Clean up-Automatic Remediation

Security For Hybrid Environment

EDR That's Built On the Strongest Protection

Stop Unknown Threats

Deep learning technology is an advanced form of machine learning, detecting malware even when it has never been seen before

Don't Get Held for Ransom

Anti-ransomware protection stops ransomware from encrypting your files and rolls them back to a safe state

Block Exploits

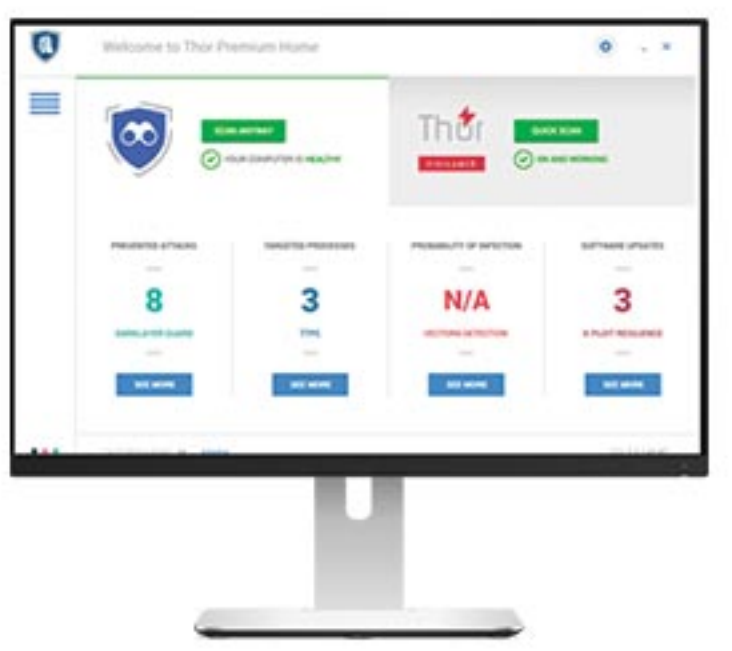

Exploit techniques are commonly used to break into organizations. Vector Detection uses exploit prevention to stop these dangerous attacks

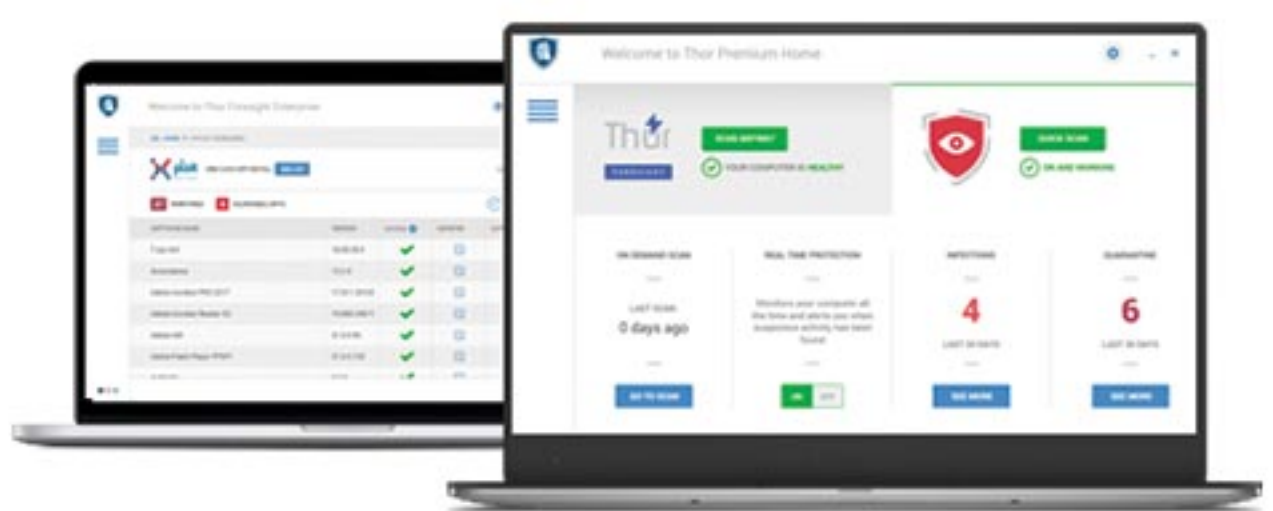

Deny Hackers

Stop real-world hacking techniques used for credential harvesting, lateral movement, and privilege escalation

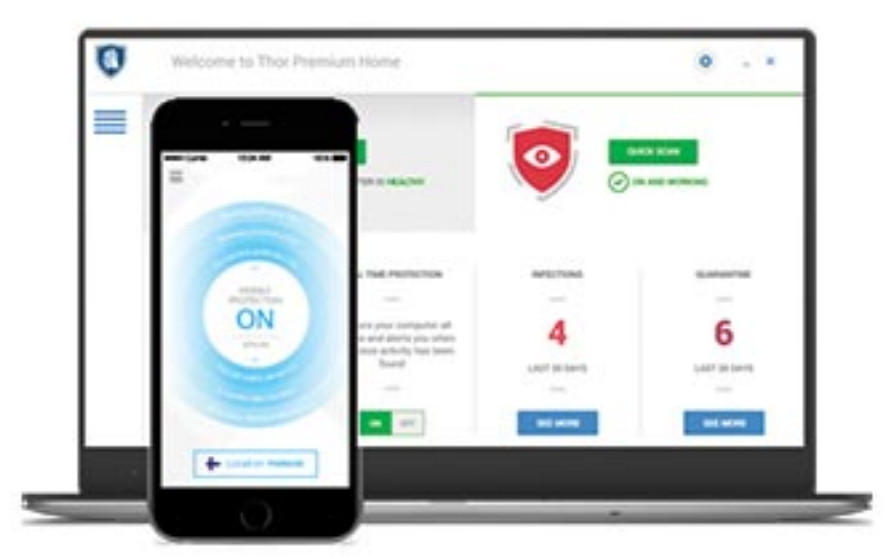

One Security Solution To Protect Your Business
