

PEGASUS PROFESSIONAL SERVICES FUTURE-PROOF YOUR DATA CENTER WITH PEGASUS

DATA CENTERS ARE THE BACKBONE OF A BUSINESS AND AN ESSENTIAL PIECE IN ANY GOOD BUSINESS EXECUTION STRATEGY.

In today's world of being "on" 24/7, speed, efficiency, flexibility and scale are now critical for meeting new connectivity and processing demands. With the speed of technology change, it is imperative that you build your data center to not only meet today's needs – but tomorrow's as well.

PEGASUS PROFESSIONAL SERVICES HELPS YOU AVOID PITFALLS IN DATA CENTER PLANNING through our team of highly qualified experts and proven processes. Our methodologies lead you through Planning, Design and Implementation to future-proof your Data Center.

KEY TASKS IN DATA CENTER PLANNING

STEP 1 BUSINESS PLANNING

Pegasus will first start with a complete understanding of your business, needs, objectives, and current/future goals in order to help you establish a fully aligned, customized technology plan.

STEP 2: DISCOVERY

We will create a clear and detailed picture of the data center. Our team will map the physical aspects of the Data Center, but also map the applications and their dependencies.

STEP 3: DEPENDENCY MAPPING

Our goal is to determine the best plan tailored for your company based on through capacity analysis, application dependencies and business requirements.

STEP 4: CAPACITY PLANNING

Identifying and planning capacity is a vital step in data center consolidation. Pegasus will accurately analyze the performance of your server assets in terms of applications and workloads.

STEP 5: IMPLEMENTATION

Our experts will begin consolidating the infrastructure defined in your custom plan, which will include both physical and virtual systems, as well as the application infrastructure on top of those systems.

STEP 6: MANAGEMENT & CONTINUOUS OPTIMIZATION

The full benefits of Data Center Consolidation are only realized through effective management. Our team will streamline the entire process, from start to finish – and beyond.
