

Optimal Healthcare with Integrative Medicine and Dentistry

Las Vegas, Nevada | November 8-10, 2018

ACAM
AMERICAN COLLEGE FOR
ADVANCEMENT IN MEDICINE

WELCOME TO THE RED ROCK RESORT

WELCOME FROM YOUR LEADERS

We think this is so beautiful!

We welcome all of you to this groundbreaking conference; a water shed moment for practitioners and patients. Each of our three organizations were created to promote, protect and promulgate a specific unmet healthcare need. ACAM was created to educate physicians and other health care professionals on the safe and effective application of integrative medicine; AAOSH dedicated its attention to the relationship of oral health and whole-body health; and AAPMD focused on recognizing the role and importance of optimal airway physiology and sleep in the areas of health, development, performance, and function.

In the past few years, a growing body of evidence supports the belief that the epidemic of chronic diseases have common origins. Cardiovascular disease, diabetes, dementia and even cancer as well as learning, performance and behavior issues have multiple common causes and can take decades to develop.

So, over a year ago, representatives for ACAM, AAOSH and AAPMD came together to explore combining our annual meeting in a way that would serve the interests of our individual memberships and provide new, exciting learning and networking collaborative opportunities. And there are so many!

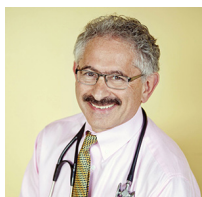

We encourage you to check out the entire program. These three days will feature presentations to the combined three groups and separate presentations to each group on their focus and interest. In addition, there are workshops, TED-type talks, case studies, combined receptions and networking opportunities. There will be a testing room to take advantage of cutting edge diagnostics to evaluate the state of your own wellness.

We will all be connected throughout the conference with the WHOVA Meeting App. Make you are signed in! Check the app for special offers, events, and for communicating with other attendees, speakers, and sponsors.

Our exhibit hall will feature our passionate corporate supporters offering products and services to supply your practice needs towards a more collaborative path. Find time to meet each one.

We hope that when you leave the conference on Sunday, you take the spirit of collaboration with you and help us continue to grow it, not just at future annual conferences, but at events, webinars, and communications throughout the year. Remember, "What happens in Vegas" may stay in Vegas, but what happens in the mouth or one part of the body does not stay there. And certainly, what you learn here in Vegas - should not stay here.

As the leaders of ACAM, AAOSH, and AAPMD we and the members of our boards would like to have the opportunity to meet each one of you, regardless which group you registered with. You are part of a growing collaborative community that will provide better outcomes for more optimal health.

AAOSH PRE-CONFERENCE WORKSHOPS

Perio Protect

Duane Keller
DMD, FAGD

Thursday, November 8 | 8:30am - 11:30am

About the Workshop

47% of American adults have chronic periodontitis. We clearly need more effective treatment. Perio patients struggle between office visits, and it's no wonder why; daily treatments fall short in pockets $\leq 3\text{mm}$ and antibiotics only aid temporarily. Treat patients more effectively with long-term chronic wound care treatment using prescription tray delivery of hydrogen peroxide gel.

Learning Objectives

- The benefits and limitations of antimicrobial and mechanical therapies for biofilm control
- How and why antimicrobials with oxidative/reduction reactions effectively manage biofilms
- How to incorporate localized antibiofilm therapies into existing treatment plans
- When infected cells must be treated with surgery
- How to help preserve the health of your implant, cosmetic, and restorative cases

Dr. Mark Cannon & Probiora

Mark Cannon
MD

Thursday, November 8 | 8:30am - 11:30am

About the Workshop

Probiotics are widely publicized and easily found in the market. However, even though almost all published studies have positive results, the use of probiotics is still not fully accepted by the dental profession. This workshop will present research on the safe and effective use of probiotics in a busy pediatric dental practice. Published documentation of approved studies will be presented along with clinical data. Dental professionals should be actively investigating the potential benefits of oral probiotic therapy for systemic dysbiosis.

Learning Objectives

- Proper determination of the most likely reasons for the oral dysbiosis
- Diagnosis of contributory causes and initiators, such as, airway, enamel defects, diet
- The plethora of products available and how to distinguish which may be the best for your patients

AAOSH/AAPMD Joint Workshop: Intro to a Collaborative Approach for Optimal Health

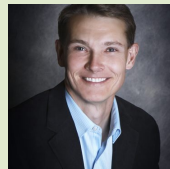

Michael Gelb
DDS

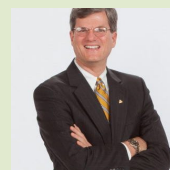

Jeffrey Hindin
DDS

Doug Thompson
DDS

Charles Whitney
MD

DeWitt Wilkerson
DDS

Thursday, November 8
1:00pm - 2:30pm

About the Workshop

What happens in the mouth does not stay in the mouth! Disorders and pathologies originating from structural and functional imbalance influence present and future health. Both the AAPMD and AAOSH have recognized this unmet and unrecognized need. AAOSH raised the banner of the oral systemic connection and the AAPMD that of the far-reaching effect of airway / sleep disorders. In this workshop, leaders from the AAPMD and AAOSH will discuss present cutting edge protocols and a future combining the best of both and incorporating the benefits of integrated medicine for better patient outcome. This is the future. If you want to be part of you must attend this workshop.

AAPMD PRE-CONFERENCE WORKSHOPS

The Importance of Muscle Function for Optimal Airway Treatment: A Foundation for Airway Health

Thursday, November 8 | 8:00am - 11:30am

Moderator

Barry Raphael, DMD

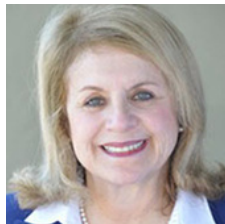

About the Workshop

An optimal airway depends on the hard dental and skeletal structures; and on the function of the soft tissue musculature. Muscle tone and function have received only limited attention in dentistry and orthodontics until recently. Today, with recognition of its relevance to the airway, practitioners are clamoring for information and training for identification and treatment to restore optimal muscle function to support patients' care. Various approaches include: myofunctional therapy, myofunctional orthodontics, cranio-sacro-fascial therapies, and more. Although approaches and techniques vary, restoring proper muscle is essential for best, long lasting results. With this awareness there will be an increased need for competent therapists in dental offices and working independently.

Physical Therapy Airway and Inflammation: Hands-On Workshop for Physical Therapists and Dentists on Posture, Cervical Dysfunction and Occlusion

Brad Gilden
DPT, CFMT,
FAAOMPT, CSCS

Ron Hruska
MPA, PT

Thursday, November 8 | 8:00am - 11:30am

About the Workshop

This workshop will outline the role that physical therapists and dentists have in recognizing when and how to engage and collaborate with each other in the management of airway position and flow.

- Participants will learn how to identify when a physical therapist should request a dentist to become involved and vice versa in interdisciplinary airway management care
- Participants will recognize primary etiologies associated with airway health
- Participants will be able to identify asymmetrical influences on the cervical spine, airway and occlusion
- Participants will learn how to recognize objective indicators for optimizing airway management with an interdisciplinary team

THE FUTURE TEAM OF MEDICINE

Thursday, November 8 | 3:00pm - 6:00pm

Our joint mission is for all healthcare professionals to collectively share in the treatment of patients through improved interdisciplinary communication and referral relationships. These talks are specifically designed to excite your thirst for knowledge and get you thinking about the possibilities that lie ahead. The Med Talks feature 3 expert speakers from each organization; each speaker will highlight innovations in our professions, setting the stage for the collaborative topics that will be delved into throughout the meeting. Join us as we spotlight how we can use these advances in our practices as we work together to improve the health of ourselves and our communities. The opening event will be the biggest and first EVER of this kind and promises to open your mind to the endless possibilities available in the fight against chronic disease. Meet the collaborative partners you may be overlooking.

Opening Collaboration Event

**Thursday, November 8
6:00pm - 8:00pm**

Kick off the joint meeting Thursday night at 6:00pm at the Opening Collaboration Event. This event is the perfect opportunity to chat with exhibitors, reconnect with colleagues, meet new associates, and expand your partner network.

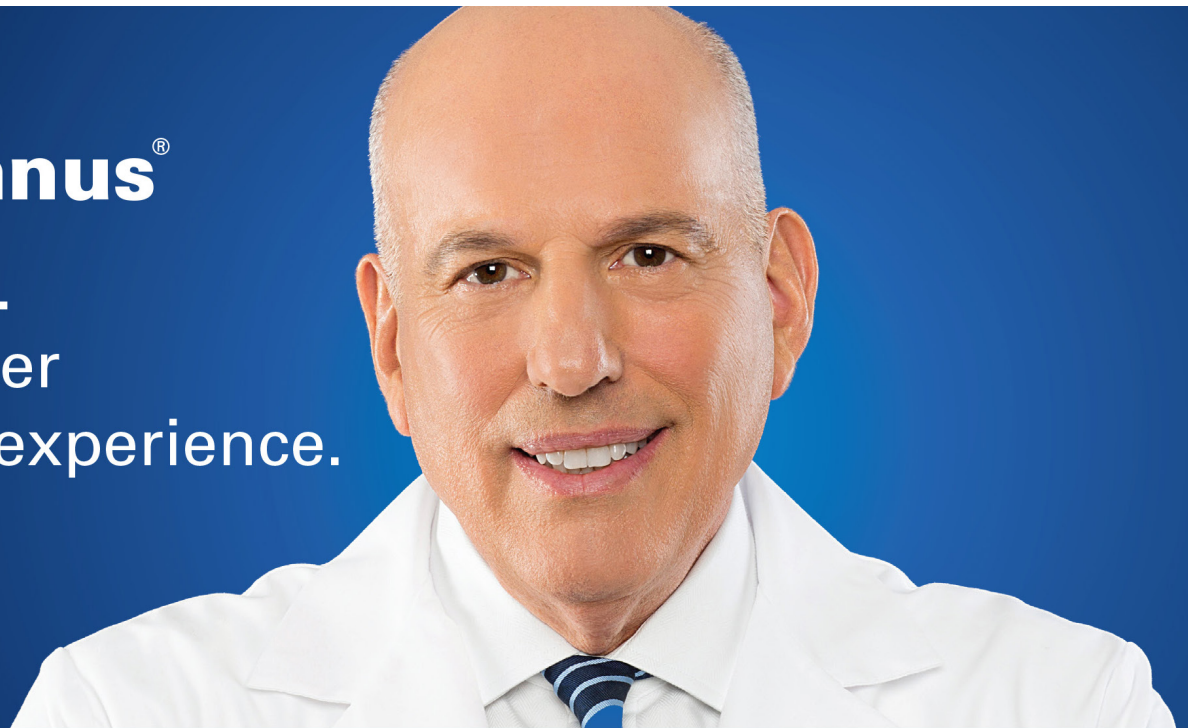

Menu

- Market Vegetable crudité
- An assortment of Middle Eastern appetizers
- Build-Your-Own-Noodle bar with vermicelli noodles, beef meatballs on the side, accompanied by assorted pho broths and additions
- Dim Sum: shrimp or chicken
- Vietnamese spring rolls in rice paper

With ProSomnus®

Precision means...
I have a better
patient experience.

—Michael Gelb, DDS, MS

// The ProSomnus Sleep Device material is so much smoother and easier for the patient to keep clean, you just don't see the typical bio-gunk as you do with other appliances. The appliances come back with no smell and no stain even after 2-3 years. With all the discussion around oral systemic connections, our appliances have to be healthy too. // —Dr. Michael Gelb, DDS, MS

// The smaller, lingualless design of ProSomnus Sleep Devices means I don't violate tongue space and with precision engineering, I don't have to protrude the patient so far to find the best therapeutic bite position. They love the fit, feel and comfort and that means better outcomes and compliance. One study demonstrated 7 hours per night and 7 nights per week averages. Now that's compliance! // —Jerry C. Hu, DDS, DABDSM, DASBA

Join the growing number of dentists who are treating more patients with greater efficiency and effectiveness.

Dear ACAM Member,

Health Products Distributors, Inc. was founded as a result of my wife's extreme chemical sensitivity and my inability to find a health practitioner who could properly support her needs. As an ACAM member, I imagine you have patients with similar special requirements. I began formulating supplements in 1988, and over the last 30 years my efforts have been focused on finding and creating the most effective healing methods and products available. I remain dedicated to this purpose, as well as to providing ongoing support and education.

#319 NEXTLEVEL PRACTICE
1133 Broadway, Ste 321 | New York, NY 10010
www.nextlevelpractice.com | 212.388.1712

Recognizing the untapped potential for better-managed dental practices, Gary Kadi, founded NextLevel Practice and developed the Complete Health Business Model. NextLevel Practice has guided more than 5,000 dental practices through their step-by-step implementation of this model, resulting in over 6 million healthier patients, over \$1 billion in increased collections, and thousands of extra, true vacation weeks. Instead of being focused on the patient's chief complaint, NextLevel's clients and their teams are focused on their patient's whole-body health.

NextLevel Practice is best in the world at creating happy teams that implement sustainable results. Dr. Brian Davey, a member of the Complete Health community, is grateful for the partnership NextLevel Practice has provided him with and the support in his personal and professional growth. Through their journey together, 'NextLevel has enabled me to build a world-class team and develop as a leader. They have allowed me to significantly increase the quality of my life and make the difference I have always dreamed of making for my community.'

Gary and his team believe that dentists have not been set up to win and achieve balance in business and in life. They build success by aligning the team around a common purpose. The barriers to success become smaller when your purpose is bigger.

#117 ClearCorrect

21 Cypress Blvd, Ste 1010
Round Rock, TX 78665
www.clearcorrect.com | (888) 331-3323

Founded by dentists, ClearCorrect's clear aligners have been discreetly correcting simple and complex malocclusion cases since 2006. ClearCorrect offers a more flexible and convenient clear aligner system to thousands of doctors around the world. ClearCorrect providers can choose between the simplicity of Flex, a pay-per-aligner system, or the peace-of-mind of Unlimited, offering comprehensive treatment and retention for five full years.

ClearCorrect providers also enjoy free registration, no minimum case submissions, no certification requirements, online and in-person training, mobile-friendly 3D treatment setups, with most intraoral scanners, and industry-leading customer support. The doctor-friendly online case management tools can be accessed on all devices and require no extra software. Based on clinical research, ClearCorrect's trimlines cover more of the gingival margin than other aligners, allowing for more comfort, better retention, and fewer attachments.

ClearCorrect is a proud member of the Straumann Group; a global leader in tooth replacement solutions that restore smiles and confidence. It unites global and international brands that stand for excellence, innovation and quality in tooth replacement and esthetics.

#401 PROBIORA HEALTH
302 Benjamin Rd, Ste 409
Tampa, FL 33634

www.probiorahealth.com | 800.983.6908

ProBiora Health is bringing the science of probiotics to oral care by developing and marketing a complete line of proprietary probiotics that are specifically designed to enhance oral health for humans and pets. Our products are developed from ProBiora3®, which was discovered by Dr. Jeffrey Hillman on the concept of replacement therapy.

ProBiora3® is a blend of three naturally occurring strains of beneficial bacteria, including *Streptococcus oralis* KJ3®, *Streptococcus uberis* KJ2® and *Streptococcus rattus* JH145®, which support overall oral health. We believe ProBiora3® is the most comprehensive oral care probiotics technology currently available in the oral healthcare market.

Starting in 2008, a line of consumer, professional and pet oral products based on Dr. Hillman's discovery was introduced under the Evora brand name. In 2009, both the EvoraPlus and the EvoraPet product lines were introduced to the consumer market. And in 2010, EvoraPro was introduced to the professional dental care market.

In June 2016, the complete line of Evora (ProBiora) consumer, professional and pet products were purchased by ProBiora Health™, which is led by Christine Koski, a former Oragenics board member and longtime investor.

#202 BODYHEALTH.COM

707 Cleveland St. | Clearwater, FL 33755

www.bodyhealth.com | 877.804.3258

Our motto: "Optimizing Health and Vitality" means what it says. With a focus on quality and purity of ingredients, BodyHealth products are crafted to help you achieve and maintain optimum health and vitality in today's increasingly toxic world.

Specifically, our objective is to educate others on how to improve and maintain the body's condition, and to provide them with the products needed to do that. You can trust us to be your partner as you travel the path of a healthy and vibrant life.

The first BodyHealth products were discovered by Dr. David Minkoff, M.D., who founded BodyHealth in 2000. In his practice, Dr. Minkoff concentrates on alternative and complementary approaches, with a focus on detoxification and dietary/nutrition changes. He believes that in order to achieve optimum health, patients must firstly, reduce the number of toxins and pollutants entering the body; secondly, increase the number of toxins and pollutants leaving the body and thirdly, improve the quality of nutrition so the body can rebuild and heal. With this in mind, Dr. Minkoff developed the range of products which BodyHealth manufacturers and distributes. These cutting-edge solutions are available to practitioners and the public, providing them with the opportunity to have access to unique dietary supplements and education. For detailed information on each of our products, please visit www.BodyHealth.com

AAOSH GOLD SUPPORTER

#307 PARATUS DIAGNOSTICS

3055 Hunter Rd

San Marcos, TX 78666

www.ParatusDiagnostics.com | 512.245.6422

Paratus Diagnostics, LLC is an organized Texas based early stage company founded in 2012 by Dr. John C. Carrano, and currently employs 16 full-time staff members. The company is headquartered in San Marcos, Texas, in a state-of-the-art (and recently constructed) technology park. Paratus Diagnostics leases about 5,000 square feet of laboratory and office space, including BSL-2 certified space. The company completed a series A round of funding in July 2016 resulting in a raise of ~\$3,000,000 from over 40 different investors.

Paratus Diagnostics follows a “hub-and-spoke” concept built around a central holding company from which we will incubate several different—yet complimentary—companies each with its own market application and commensurate product and

technology focus. The business structure is very much consistent with the original premise of Paratus Diagnostics, which recognized that a common denominator missing from all diagnostic and biological detection devices is a simplified sample preparation solution. The genesis of our company was built on the notion that a common (or universal) module could be constructed that would enable many different diagnostic applications and assay formats while maintaining a common core design and manufacturing structure.

AAOSH GOLD SUPPORTER

#407 PERIO PROTECT

3955 Bayless Ave, Ste. 200

St. Louis, MO 63125

www.perioprotect.com | 314.256.0772

Perio Protect is on a mission to end the cycle of periodontal disease by addressing gingival infections as chronic oral wounds. All practitioners who recognize the need to overcome the limits of acute care and antibiotic transitory benefits will want to add the prescription Perio Tray® to their treatment protocols. The Perio Tray® by Perio Protect has a unique peripheral seal that prevents medication from leaking all over the mouth to push medication deep into periodontal pockets so that the medication can fight infections.

The oxygenating and oxidizing effects of hydrogen peroxide have proven to be more beneficial than antibiotic therapy. The benefits are also longer lasting because you empower your patients with this prescription tray. Toothbrush, rinse, and floss can't get deep enough to manage the bacteria between office visits. The tray can.

Perio Protect also educates dental professionals on prescription Perio Tray® usage. Ask about your training options so that you can help your patient manage the inflammatory consequences of tissue breakdown. Patients love the clean feeling in their

mouths, the gradual whitening, the fresher breath, and the beautiful pink gums. You will love the healthy results.

HINDEXRV

**2 Executive Blvd, Ste 206
Suffern, NY 10901**

www.hindexrv.com | 888.751.1121

HindexRV® is an FDA approved cutting-edge physiological monitoring system. The HindexRV® system monitors the autonomic nervous system using accurate recordings of multiple physiological parameters and statistical data which the clinician can use to make a clinical assessment of medical, dental, or peak performance interventions.

HindexRV® physiological sensors, instrumentation and computer driven programs record 2048 measurements per second, nearly ten times the number of readings than other Heart Rate Variability (HRV) monitoring devices available. The clinician can access objective measurements of ANS arousal instead of relying on subjective feedback from the patient.

The HindexRV system measures EKG, EMG, Respiration, Heart Rate and HRV. It monitors the arousal of a subject's autonomic nervous system during the use of therapeutic modalities. Using this system, the supervising clinician gains an objective reference to whether the therapy/modality has been optimally applied. HindexRV® can record data of physiological changes to support the efficacy of the treatment and offer the opportunity to communicate with other healthcare practitioners and researchers using a common language.

The dental and medical uses include:

- Sleep breathing disorders and TMD treatment
- Bite registration and adjustment of orthotics
- Orthodontic and restorative dental treatment
- Athletic performance

- Systemic autonomic disorders: inflammation & nutritional interventions

HindexRV® is a turnkey system that includes all hardware, software, a dedicated laptop, Bluetooth connectivity, statistical analysis software, disposables along with education and training.

For more information, please visit www.hindexrv.com, call 888-751-1121 or email hhssystems@gmail.com

Panthera Sleep is a world leader in CAD/CAM dental sleep appliances. With their 17 years of expertise in CAD/CAM dentistry, Panthera Sleep's founders have created high end Mandibular Advancement Devices, this solution being the most effective to help people with snoring and sleep apnea-related problems.

Panthera Sleep has successfully combined creativity, science and know-how to develop its proprietary innovative technology and is now able to offer next-generation products to the sleep industry worldwide. By establishing the Sleep Division, Panthera Dental's goal is clearly to keep helping patients and procure them a most-deserved good night's sleep and quality of life.

The Panthera Dental team uses its own proprietary software to design the Panthera D-SAD. From a 3D scan of the stone model or intra-oral scan, each device is designed specifically for your patient. Panthera's state-of-the-art CAD/CAM technology will deliver a

perfectly adapted device. This procedure provides more predictability for a completely customized device.

In order to accommodate every patient, we offer a wide range of plateaus for tailored contact surfaces: standard, full and anterior. Since the D-SAD can be adapted for every possible situation, it is suitable for all types of patients.

#210 BALE DONEEN METHOD
www.baledoneen.com | 866.217.9272

The wonderful news is that heart attacks and strokes are preventable. However, it often takes more than medicine's standard of care. Two recent peer-reviewed studies demonstrated that our comprehensive, personalized prevention plan, the BaleDoneen Method, successfully halted or even reversed CVD in a cohort of our patients, helping them avoid heart attacks and strokes, even though some of them have already suffered one or more of these events, putting them at particularly high risk for recurrence.

Our patented method uses advanced CVD detection techniques to accurately identify "hidden" for heart attacks and strokes in seemingly "healthy" patients, such as:

- Genetic testing: State-of-the-art ultrasound measurements of major arteries.
- High-tech heart scans: A "fire panel" of blood and urine tests for arterial inflammation.
- A comprehensive, personalized assessment of each patient to check for red flags for cardiovascular risk and early signs of CVD, which typically develops silently over many years until it becomes severe enough to trigger a heart attack or stroke.

#210 CARDIORISK LABORATORIES

www.cardiorisk.us | 888.724.7484

CardioRisk Laboratories is a world-class service company focused on early detection and monitoring of cardiovascular disease—the number one cause of morbidity and mortality in the Americas and Europe.

We provide the world's medical communities with non-invasive, cost-effective products and services to identify and help reduce the incidence, morbidity, and mortality of heart attacks, strokes, and other ischemic events.

We provide physician's offices nationwide with proprietary ultrasound image scanning, and processing, using FDA cleared equipment, patented software, a nationally recognized screening protocol, and a highly trained staff validated to the most rigid scientific methodologies and quality standards. This helps to minimize variability between offices and patients, while significantly minimizing the risks, capital, and labor expenses associated with operating an in-house system.

We maximize office efficiency and convenience by making our services available directly at the physician's office or local clinics. Our staff maintains the highest level of professional and ethical behavior. CardioRisk Ultrasound is the gold standard for quality and convenience.

FORWARD
SCIENCE

#214 FORWARD SCIENCE

www.forwardscience.com
855.696.7254

Forward Science™ is a privately held bio-technology company based in Houston, Texas. The medical device company was founded with the goal of advancing oral healthcare through early discovery (OralID), diagnostics (CytID, PathID, hpvID, pHID), and treatment options (SalivaMAX, SalivaCAINE).

OralID, Forward Science's flagship product, is an award winning oral cancer screening device that allows clinicians to Shine Light. Save Lives.™ by identifying abnormalities that may not be seen under traditional white light examinations. Forward Science quickly expanded its product portfolio in efforts to provide clinicians with a complete program to battle the rising trends of oral cancer. With the launch of the ID For Life™ Program, Forward Science has evolved into the industry leader for oral oncology. The ID For Life™ Program includes the following in an effort to change the trends for oral cancer: screening device (OralID), diagnostic tests (CytID, PathID, hpvID, pHID), and treatment options (SalivaMAX, SalivaCAINE). SalivaMAX is an FDA Cleared prescription strength rinse for all ranges of xerostomia; whereas, SalivaCAINE is used to relieve the pain. Together, SalivaMAX and SalivaCAINE are a true solution for the common side effects cancer patients experience on a regular basis.

#118 HEALTHYSTART

950 Green Bay Rd, Ste 205 | Winnetka, IL 60093

www.thehealthystart.com | 800.541.6612

The Healthy Start System by Ortho-Tain addresses the root causes of Sleep Disordered Breathing in children while straightening teeth without braces. We provide lectures educating on Sleep Disordered Breathing to identify the outward symptoms and treat the root causes and orthodontic conditions with more permanent results. Healthy Start treatment is a non-pharmaceutical, non-invasive, more natural system for 9 out of 10 children affected with Sleep Disordered Breathing. We call this a "silent crisis" and can treat age 2 through adult. Also available are sleeping appliances for adults used to address obstructive sleep apnea as well as straightening teeth without braces.

InBody #313 INBODY

www.inbody.com | 615.587.2558

"Clinically tested, InBody strives to help healthcare professionals provide data-driven preventative care through medical grade body composition analysis. Medical and dental professionals use InBody DSM-BIA body composition analyzers for early identification of disease-risk factors and management of systemic diseases. An InBody Test helps healthcare professionals: obtain objective measurements of a patient's muscle level and body fat to gain accurate insights into health status and disease risk, identify and track fluid imbalances related to systemic inflammation, and monitor the outcomes of a comprehensive oral-systemic health plan to prevent the onset of systemic diseases or worsening of complications. InBody devices do not rely on empirical estimations; therefore, healthcare professionals can be certain that InBody Test results accurately reflect patient health from the inside out."

DENTISTRY NETWORK**

**3684 W. Maple Rd
Bloomfield Hills, MI 48301**

**www.wellnessdentistrynetwork.com
248.785.3890**

As an AAOSH Member and attendee at this event, you've already determined that the future of dentistry is about more than just healthy teeth and gums. We know that conditions of the mouth affect and are related to conditions in the rest of the body. But how can your practice go from knowing to doing? And how can you differentiate your practice from the many other options patients in your market have?

Over a period of 5 years, Dr. Doug Thompson and his dental team at Integrative Oral Medicine worked to create the Wellness Dentistry Network so that you and your team could have immediate access to the tools we've used to transform our practice into a wellness practice.

In addition to that content, we have quickly built a community of more than 100 like-minded healthcare professionals committed to working together to change the lives of patients around the world.

As our membership and partnerships grow, so does the data we have gathered, which informs new developments and techniques, meaning you can be on the cutting edge of oral systemic health with us, not trying to get there and stay there on your own.

If you are serious about your health, the health of your practice, and the overall health of your patients, please visit us at our booth or contact us at contact@wellnessdentistrynetwork.com to learn more.

705 Pennsylvania Ave | Sarasota, FL 34243
www.natural-immunogenics.com
888.328.8840

Since 2001, Argentyn 23 has offered health care practitioners a strategic immune-enhancing alternative devoid of toxic side effects and contraindications. Made from the purest silver (99.999%) and pharmaceutical-grade water, Argentyn 23 Bio-Active Silver Hydrosol is composed of more than 98% positively-charged silver ions and nanoclusters. It is only packaged in non-reactive glass bottles at a verified concentration of 23 parts-per-million. Argentyn 23 represents the ultimate refinement of the colloidal silver category and offers your patients unmatched safety, efficacy and purity in a professional formulation. Trace amounts of silver are naturally found in all mammalian milk, in grains, all mushroom species, and most water sources. Thousands of clinics across North, Central and South America and Europe have made Argentyn 23 the #1 selling professional silver brand due to its unmatched quality and efficacy. Natural Immunogenics is the only NSF/GMP-Certified silver manufacturer in the world. Test results are verified by qualified 3rd party laboratories, including purity testing, efficacy and bacteriological studies as well as non-toxicity assays.
