

CAPABILITY OVERVIEW

If you are planning for the future or need help managing your on premises environment, Genesis10 can help you Do It Right the First Time.

Regardless if you are evaluating the business need for an ERP or selecting which ERP platform is right for you or at the other end of the spectrum you have an existing ERP and are looking to upgrade or move to the cloud, then Genesis10 is your partner of choice with more than 20 years of experience supporting our clients to facilitate these exact decisions. Our services include:

EVALUATIONS/ ASSESSMENTS

Provide advisory support from facilitating ERP solution selection to evaluating the current state and developing a modernization roadmap to include cost/benefit analysis and business justification.

IMPLEMENT

Cradle to grave full lifecycle support from design, document, install, configure, re-engineer and manage change – people and process.

UPGRADE

Continue to capitalize on the vendor R&D efforts by upgrading your platform to stay current, starting with a clear line of sight approach to manage disruption and change.

MANAGED SERVICES/ SUPPORT

Capitalize on collective ERP management experience - and leave the sustainment support to us. In a turnkey managed service model, we support operations, patches, upgrades, monitoring and troubleshooting.

- and more ...*

CASE STUDY EXAMPLES

Global SAP Rollout

Situation: Global American Clothing Company with 6 iconic brands and a presence in North America, and Europe acquired another clothing company to expand their global footprint into Asia and Latin America, making this clothing company one of the largest global branded lifestyle apparel companies in the world.

Opportunity: Transition from current fragmented ERP footprint to SAP globally.

How We Helped: The initial award for Phase 1 to facilitate the planning phase and template standardization process for the SAP Financial systems on ECC6. After successful completion of Phase 1, Phase 2 was awarded to complete the three-year global Financials rollout and data conversion.

Global Oracle Rollout

Situation: A global consulting HR firm merges with a professional services firm specializing in Human Resources, Financial Services, Reinsurance intermediary and actuarial services to form the largest employee-benefits consulting firm by revenue that has over 14,000 employees and provides services in 35 countries. The newly formed entity decided to modernize their disparate legacy ERP financials and HCM systems into a single Global Instance of the Oracle EBS Platform – R 12.1.3.

Opportunity: Act as their internal implementation partner to design, implement and manage the global rollout of the financials and HCM modules.

How We Helped: The team was organized by module – Financials and Human Capital Management (HCM) in order to leverage the “right domain subject matter expertise.” By leveraging experienced domain experts, we were able to right size the team between 25 and 30 to effectively and successfully complete the three year global implementation across North America, Latin America, South America, Europe, Middle East, Africa, and Asia Pacific. The team successfully stabilized the platform and facilitated the strategic decision to migrate to the cloud. In turn, the platform was upgraded to the 12.2.x platform as a prelude to the Oracle Cloud migration.

VALUE PROPOSITION

Structured vendor partnership

Tap long-standing relationships with leading ERP providers, eases implementation

ERP implementation arbitrage

Similar capability but at more attractive price point

Speed to delivery

Strong industry knowledge coupled with experienced proven subject matter experts, positions Genesis10 to ramp up fast and accelerate delivery value

Proven bench strength

Majority of the team has 10+ years of hands on experience

Customer-centric

We act with a sense of urgency and purpose to deliver against your goals.
