

## CHILLER SYSTEM PREVENTIVE MAINTENANCE CHECKLIST Inspection

TANKTEMP.COM 503.389.8818

## **Yearly Inspection Checklist**

Don't wait until it breaks. Both in terms of cost and lost productivity, it is much better to proactively maintain your equipment. Our integrated maintenance solutions allow you to run uninterrupted throughout the year. Why waste your time and money and risk being down when you need your chiller the most—become one of our Preferred Maintenance clients and leave it to us.

	Monitor system for correct phase & volts/amps		Inspect evaporator coil, drain pan and condensate drain lines/leaks.
	Inspect frame, fit and finish, and proper		Inspect heat exchanger &/or heating
	clearances. 24" from wall.		elements.
	Monitor system starting characteristics. Run to settings		Inspect all plumbing fittings in unit for leaks.
	Inspect unit for proper refrigerant level		Inspect pumps and filters.
_	and adjust if necessary.		Test glycol brix
	Measure high and low side system		Listen for abnormal noises.
_	pressures.		Search for source of unusual odors.
	Inspect fan motor and fan blades for		Inspect coil and cabinet - cleaning
	wear and damage.		available for an additional charge.
