# ATM & Kiosk Management

Connecting the Dots in Omnichannel

# **Deliver more than just cash withdrawal services with BPC's SmartVista ATM Management**

Today's ATMs offer so much more than cash withdrawals. Often equipped with advanced technology like biometric authentication and contactless interfaces, customers can do anything from buying prepaid cards to topping up mobile accounts.

Financial institutions can reduce their customers' reliance on branches by offering self-service capabilities via ATMs and kiosks. The result? Time-savings for banks and customers alike.

# Unlock a new source of revenue

ATMs offer consumers a convenient way of accessing a range of value-added banking services, services that you can monetise and use your institution's ATMs as extra sales channels.

## How it works...

- SmartVista ATM
- Management provides complete, real-time monitoring and control of the ATM network and its operation, including the availability of cash at each ATM, as well as self-service kiosks.
- Any irregularities trigger alerts to the financial institution.
- Screens can be personalised for specific ATMs or customers.
- It supports cash recycling, remote key loading, Dynamic Currency Conversion (DCC), and eJournals management.
- SmartVista allows interactive AV communication between ATMs and contact centres so customers can speak to staff members if needed.
- The smart cash management solution simplifies ATM cash demand forecasting, with its forecasting, planning, and reporting tools.
- It supports a variety of services including cash withdrawals, balance inquiries, mini statements, fund transfers, P2P payments, Western Union remittance and money transfers, bill payments, mobile top-ups, and utility payments.

# Key benefits of SmartVista ATM Management

- › Kiosks and ATM for digital ‘anything as a service’
- › Real-time monitoring, 24/7 uptime
- › Digital onboarding - on site
- › Full brand presence on ‘every corner’
