

Environmental Impact Initiatives

Organization-Wide Sustainability Efforts

Staff recycles paper, plastic, metal, glass, corrugated materials, florescent light bulbs, and printer cartridges.

Manufacturing Works contracts with a document shredding company that recycles.

Manufacturing Works purchases recycled envelopes, business cards, paper towels, and toilet paper.

Whenever possible, two-sided copying is used.

At meetings and events, Manufacturing Works uses china coffee cups, stainless steel utensils, and box lunch containers made from recycled materials are used instead of plastic.

Community Impact Sustainability Initiatives

One of Manufacturing Works' core initiatives focuses on rebuilding the urban core to counteract the impact of "industrial sprawl" through spearheading brownfield reclamation and redevelopment projects.

Manufacturing Works' Manufacturing Assistance Program was an early promoter of building sustainability principles into business practice. Sustainability Learners Groups were launched to engage company leaders in learning implementation skills through a facilitated peer-to-peer discovery model.
