

HOW CAN THE FINANCIAL SERVICES SECTOR PROTECT AGAINST PRIVILEGED ACCOUNT BREACHES?

The incoming chief of New York's top financial services regulator called cybersecurity "the number one threat facing all industries and governments globally" during a speech in April 2019 at the Association of the Bar of the City of New York.¹

Cyber attacks also cost financial services firms more to address than firms in any other industry at \$18 million per firm (vs. \$12 million for firms across industries).²

To make matters worse, financial services firms fall victim to cybersecurity attacks 300 times more frequently than businesses in other industries.³

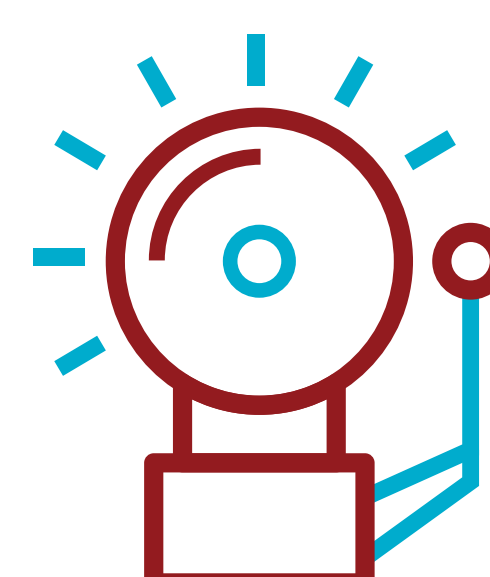

So how are attackers getting in? According to Forrester Research's most recent Wave report on Privileged Access Management: 80% of security breaches involve privileged credentials.⁴

FINANCIAL SERVICES COMPANIES IN PARTICULAR

LEARN HOW YOU CAN BRING AGENTLESS PRIVILEGED ACCESS MANAGEMENT TO YOUR ORGANIZATION JUST IN TIME.

face immense challenges in managing privileged accounts. So what does this mean for CISOs in the financial services sector when assessing their organization's overall security posture?

INTRODUCING THE NIST CYBERSECURITY PRACTICE GUIDE SP 1800-18, PRIVILEGED ACCOUNT MANAGEMENT.

Written with guidance from [Remediant's Paul Lanzi](#), Co-Founder, and COO, this guide expands on existing NIST guidance to deliver actionable steps to help your organization:

1

Learn to quantify the risk

2

Limit opportunity for a successful attack

3

Improve efficiencies by reducing complexity

4

Simplify compliance
