

# DIGITAL TRANSFORMATION OF THE HEALTHCARE SECTOR IS DRIVING AN INCREASE IN CUSTOMERS ACCESSING THEIR HEALTH DATA ONLINE

This increased access is exposing millions of healthcare records to possible data breaches.

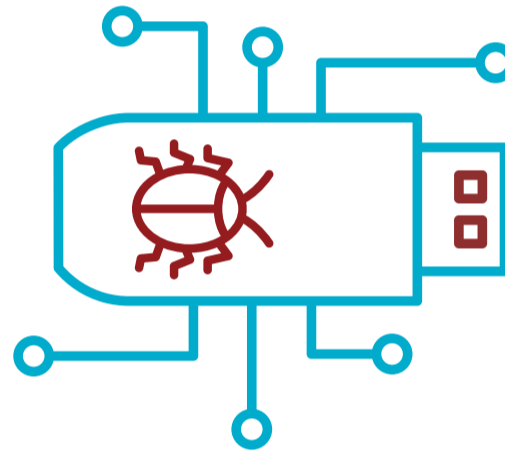

## SINCE 2009

more than **190 million** healthcare records have been exposed or stolen, which is equivalent to,

**59%**

of the population of the United States

<https://www.hipaajournal.com/study-reveals-how-well-consumers-feel-health-data-is-protected/>

**66%**

of internal and external actors are abusing privileged access credentials to access databases and **exfiltrate** proprietary information

\*Verizon's 2018 Protected Health Information Data Breach Report (PHIDBR).

At the same time, CIOs and CISOs at healthcare organizations are focused more on HIPPA compliance than cybersecurity, leaving vulnerabilities.

Healthcare breaches reported in March exposed data of:

## MARCH 2018

**346,386 people** affected by healthcare breaches were reported

## MARCH 2019

**883,000 people** affected by healthcare breaches were reported

UP BY **155%** FROM 2018
