

Astute's V9.2 Implementation

It takes more than just technical know-how to effectively implement Oracle products – it requires a thorough understanding of the industry-specific business processes that are vital to fulfilling the end-user's specific needs and objectives.

Astute has been successfully implementing Oracle PeopleSoft products in mission-critical deployments for more than five years. We have created a brand name and reputation as a leader in PeopleSoft implementations, as well as upgrades and support services. As a result, we have received numerous customer references from Oracle/PeopleSoft User Groups, where we have been recognized for our proprietary solutions, including our notable Fast Track Methodology and Tools.

We leverage our rich experiences in PeopleSoft to deliver implementations with a combination of experienced resources, industry-leading processes, and time-saving methodologies.

PEOPLESOFT IMPLEMENTATION SERVICES
