

Report Number: RTBL-AC

Acid Neutralizer

Absorbent w/ Color Indicator

When applied to an acid spill, Eco-Absorb Acid Neutralizer will indicate the acid by turning red. – Then as it neutralizes the acid and becomes a safe pH level, the color indicator changes to a natural tan color, indicating that it is safe to handle and dispose.

It is permanently dust free, unlike other neutralizers and it is super absorbent, making picking up the spill quick and easy. Leaves absolutely no residue.

ACID NEUTRALIZER

- Color Indicator Feature!
- Immediately Neutralizes Acid Spills
- Permanently Dust Free
- Super Absorbent
- Leaves NO Residue
- Can be used on all spills
