Technical Report

BUGS 'R' DONE

Food-Grade Indoor and Outdoor Bug Killer & Repellent

BUGS 'R' DONE is a highly effective environmentally safe indoor and outdoor insecticide containing pure orange peel oil, nature's own botanically derived, insecticide. In combination with four other ingredients, all named by the U.S. Food & Drug Administration as "GRAS", generally regarded as Safe in human foods. BUGS 'R' DONE attribute is a warning-free EPA-approved label in EPA's least hazardous category IV.

It is labeled both for use around food, children and pets anywhere inside and outside homes, schools and restaurants. BUGS 'R' DONE kills disease-carrying cockroaches, flies, mosquitoes and fire ants.

Features and Benefits:

- The effective ant, roach, fly, spider & mosquito killer health conscious people seek
- The insect control product you will use with confidence around food, children, fish especially sensitive cats, dogs & birds
- Don't be fooled by imitators of water-based d'limonene products. Ours is not water-based, therefore better kill and longer residual
- The MOST effective natural bug killer made with FDA listed ingredients safe in human foods
- Long Lasting residual repellency keeps annoying insects away
- ENVIRONMENTALLY FRIENDLY. MEETS CALIFORNIA PURE AIR STANDARD

Available in cases of 12 x 16 oz.: 4x1 Gallons: 5-Gallon Pails
