# CLAY COMPOUND

Take Your Paint Back to that Showroom Shine

Safest and most effective way, to remove contamination from your vehicle's paint. Clay Compound removes particulate debris and contaminants that washing and polishing can't. Our unique product "Clay Compound", will remove embedded grains of metal, tree sap, airborne environmental dispersants and paint overspray.

Clay Compound isn't hazardous to your paint, but it is strong enough to take your paint back to that showroom shine. Use Chemex Waterless Wash and Shine, after application, for a long lasting and protective shine.

- Removes dead pigment & contamination—ONE-STEP Process!
- Safely removes tree sap from vehicles
- No clay bar mess
- Removes embedded surface contamination
- Restores a smooth-as-glass feel
- Professional results with high tech chemistry

**For What the Pros Use:** Safe for paint, fiberglass and gelcoats. Suitable for compounding boats, cars, RVs

**Fast and Smooth:** High-performance, compound is formulated for removing oxidation and defects on automotive surfaces

Available in cases of 12 Aerosol Cans
