# FIREBALL

## Non-Acid, Fast-Acting Drain Opener

A fast acting, non-acid liquid for opening and maintaining drains and traps in sinks, tubs, toilets, urinals and floor outlets by dissolving and liquefying grease, paper, sanitary napkins, hair and soap residue that holds it together. Great also for cleaning commercial grease traps.

### Benefits:

**Clears Blockages:** Dissolves blockages of such things as paper, sanitary napkins, cigarettes, hair and coagulated soap that hold it together.

**Heavier than Water:** The heavy specific gravity of Fireball causes it to sink through standing water and directly attack blockages.

**Harmless** to porcelain, plumbing fixtures and septic tanks.

### Uses:

For regular maintenance and opening blocked drains, traps, and down lines in sinks, tubs, toilets and urinals...and for dissolving grease and food residue in grease traps.

### How to Use:

Size of drains and extent of blockage can vary. Recommendations below should be adjusted to conditions.

Small Drains .....8oz..... Allow to stand 15 minutes  
3' to 4' Drains ..... 1pt ..... Allow to stand 20 minutes  
Toilet Bowls ..... 1pt ..... Allow to stand 20 minutes  
6' to 8' Drains ..... 1qt ..... Allow to stand 30 minutes  
Grease Traps ..... 1qt ..... Allow to stand 30 minutes

### For Preventative Maintenance:

Use 3-6 oz. of product weekly. Allow to stand 5 minutes before rinsing through system. Pour product slowly and carefully to avoid splashing on skin or clothing. No need to remove standing water - this product is heavier than water and will flow to the blockage. After drain is clear, flush with warm water for about 5 minutes.

### Specifications:

Appearance ..... Colorless liquid  
Odor ..... Practically odorless  
pH ..... 14.0  
Specific gravity .....  $1.260 \pm 0.005$   
Flash point ..... None to boiling
