

U.S. R.

URATIC SALTS REMOVER

U.S. R. Uratic Salts Remover is our specialty product designed for one particular problem-urinal pipe build-up. What makes U.S.R. so accepted is that this particular problem is found in every restroom with urinals. Any urinal in operation will develop offensive odors caused by the build up of uratic salts. This uratic salts build up in the plumbing lines takes the form of a hard, crystalline substance that smells horrible and resists all drain openers.

U.S. R. safely and easily removes this build up, eliminates the cause of the odor and cleans the fixture.

For a simple observation of U.S. R.'s effectiveness, put an entire egg into a glass containing U.S. R. and water (the eggshell simulates the calcium & minerals deposits found in urinals). Notice how rapidly the U.S. R. begins its job to dissolve the shell. When complete (eggshell completely dissolved) the membrane of the egg is left intact, indicating the degree of safety.

Directions for Use:

Use U.S. R. according to label instructions. Use on a regular P.M. maintenance schedule, typically once or twice per month to eliminate these problems. Use at the rate of 4-6 oz. per urinal, to insure a free-flowing drain line.

Keeps them flowing...
