

Technical Report

RAPID SEAL

Flat Roof Repair

- Stops leaks immediately - even in pouring rain
- Actually seeks out, swells and seals the leak immediately
- No need to identify the exact area of the leak
- Works where most other products won't
- The instant problem solver
- Simply disperse in the general area of the leak and let Rapid Seal "Do It's Thing"
- Won't interfere with permanent repairs made later
- Another Chemex environmentally safe solution
- No VOC's

RAPID SEAL is a non-polluting, non combustible pellet formulation that gets drawn into the area of the leak, swells and stops the leak immediately. It will work even in pouring rain! Requires no special tools, training or labor. Just disperse on any flat roof: apartments, schools, institutions, hospitals, factories, malls, etc. Keep some on hand for an immediate, temporary solution to water leakage on your built up or flat roofs.

Available in 25lb. plastic containers. Coverage about 50 sq. ft. per pail. Simply pour directly from pail into a 1/2" layer over the suspected area of the leak. Net weight 25lbs.

Chemex Industries, Inc.
