Protect Your Crew

One missed safety guideline could endanger the safety of your whole operation.

Are member organizations complying with the latest safety guidelines to ensure their crews remain compliant and safe, so that there is no disruption to critical infrastructure projects?

Send Automated Texts

at predetermined times with a link to a customizable safety checklist. No app necessary!

Customize the Messaging

in your questions to meet your guidelines and in your text to specific employees based on their work schedules.

Easy to Import

your questions to meet your guidelines and customize texts to specific employees based on their work schedules.

Customize Groups & Schedules

to send different teams in your company at different times, with the ability to modify individual and group SMS.

Employees' Self Certify

at the end of the safety checklist to ensure that they are providing accurate information to ensure compliance.

Risk Alert Notifications

if a risk factor is noted, Crew Minders provides actionable next steps for the employee and notifies your administrator.
