Grade Average Computation

A student's grade point average (GPA) is calculated based upon semester grades in all courses from the beginning of ninth grade.

Due to an exceptional level of difficulty, semester grades for Honors (H) courses are given an extra GPA weight of 0.5.

Semester grades for Advanced Placement and Dual Credit (AP/DC) courses are given an extra GPA weight of 1.0. The extra weight is reflected in the student's semester GPA calculation.

Class Rank

Due to small class size in our rigorous college preparatory curriculum, class rank is not necessarily an accurate representation of the caliber of a particular student at SACS. Individual class rank is used to determine the Valedictorian and Salutatorian. As a limited-ranking school, SACS only reports class rank for students in the top ten percent of their class. Class rank is determined by the GPA earned during 9th-12th grades. Advanced Placement (AP), Dual Credit (DC), and Honors (H) courses are weighted.
