

# Coordinating multiple Scrum Teams in times of remote working

*We will start in a couple of minutes*

Serge Beaumont, 08-05-2020

## What we will discuss today

- The Challenge
- Common Goals
- Coordination
- Personal Autonomy
- Tools

# The Challenge

## Coordination is already hard in the best of times..

Weren't you  
guys supposed  
to...

But you  
first need  
to...

I thought  
they  
were...

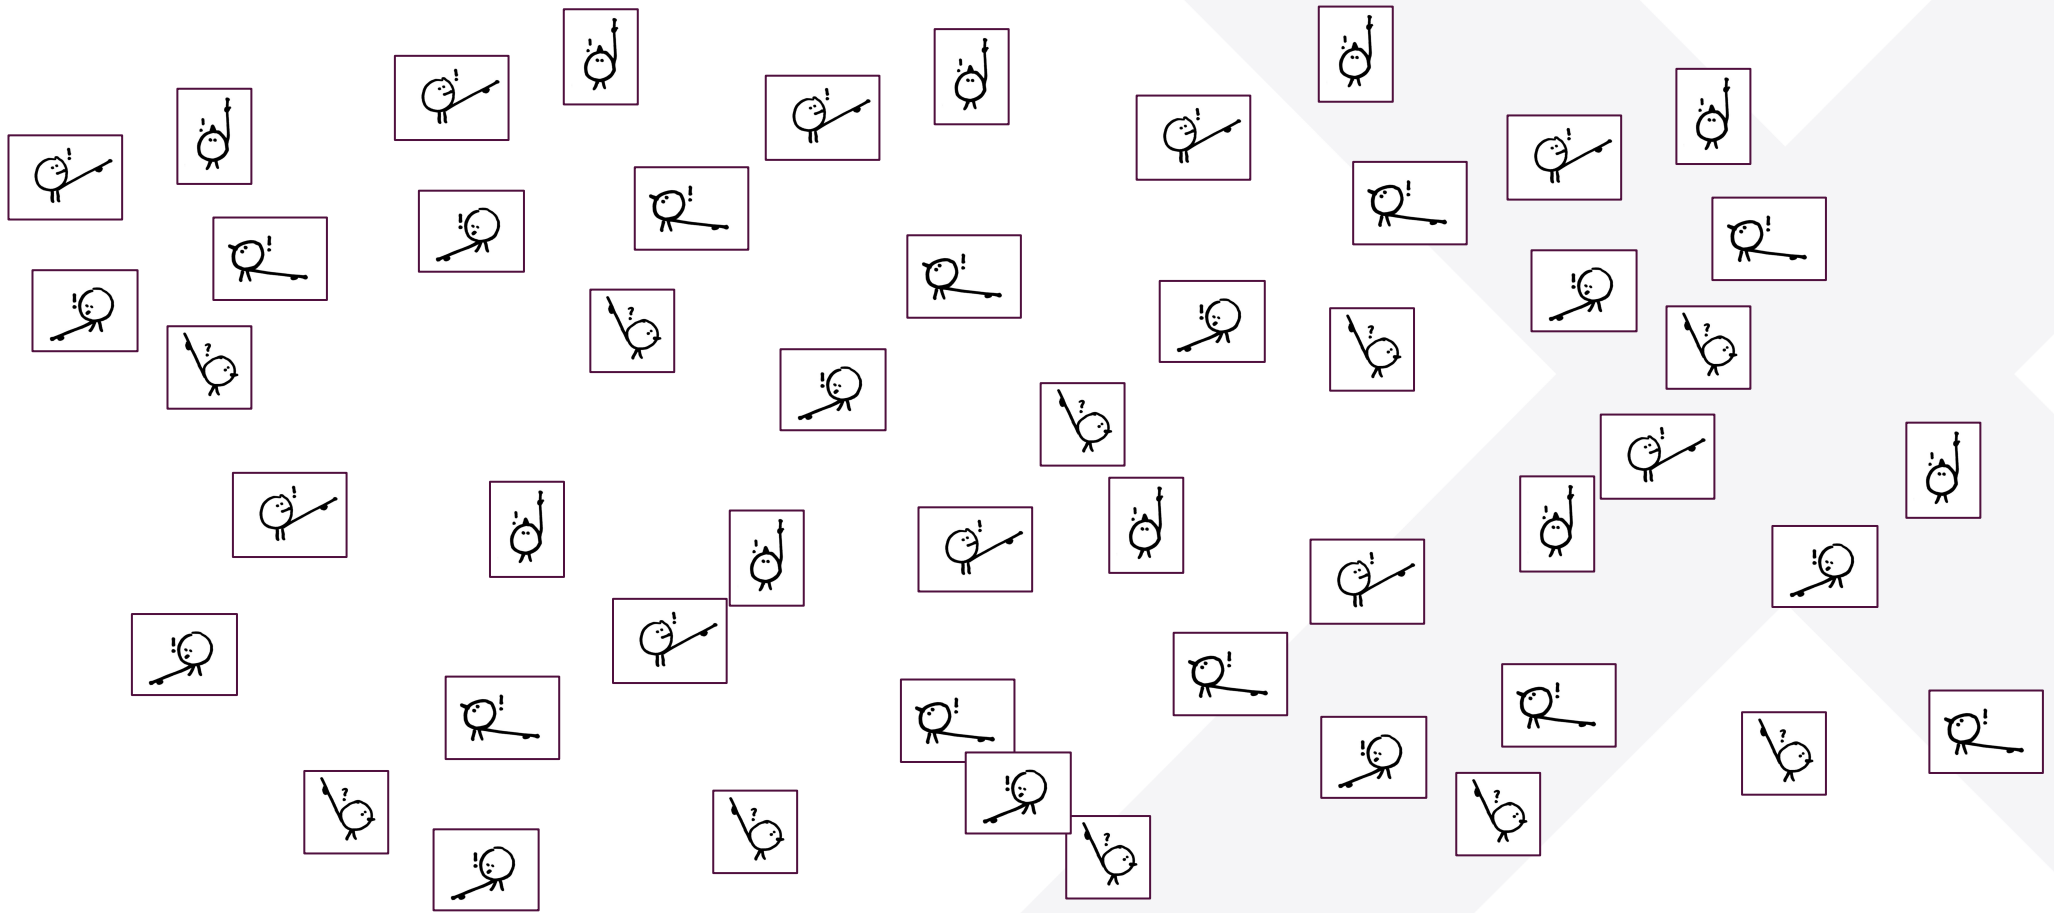

Did you  
finish...?

...and it's even more challenging when scaling...

...let alone in an all-remote situation.

# Micromanagement does not scale – *especially* remotely

## You might recognize some of these problems

- Team members feel alone and isolated
- Turnaround of discussions takes days instead of minutes
- What teams deliver is not what stakeholders expected
- Team members are not clear on what needs to be done
- Team members do double work
- Team work gets picked up by no-one
- Team members in constant alignment meetings; lots of overhead
- Impediments do not get resolved quickly
- Teams do not improve or speed up

*Remote work highlights what is already broken,  
don't miss this opportunity!*

## “Crowdsource” your leadership and self-organization

## “Crowdsource” your leadership and self-organization

# **A Team is A Common Goal**

## A team is a team because of a common goal

## Goals over Activities: a subtle but important distinction

## Clear and common goals are a prerequisite with all-remote

...because team members have to figure out their own working day activities at home

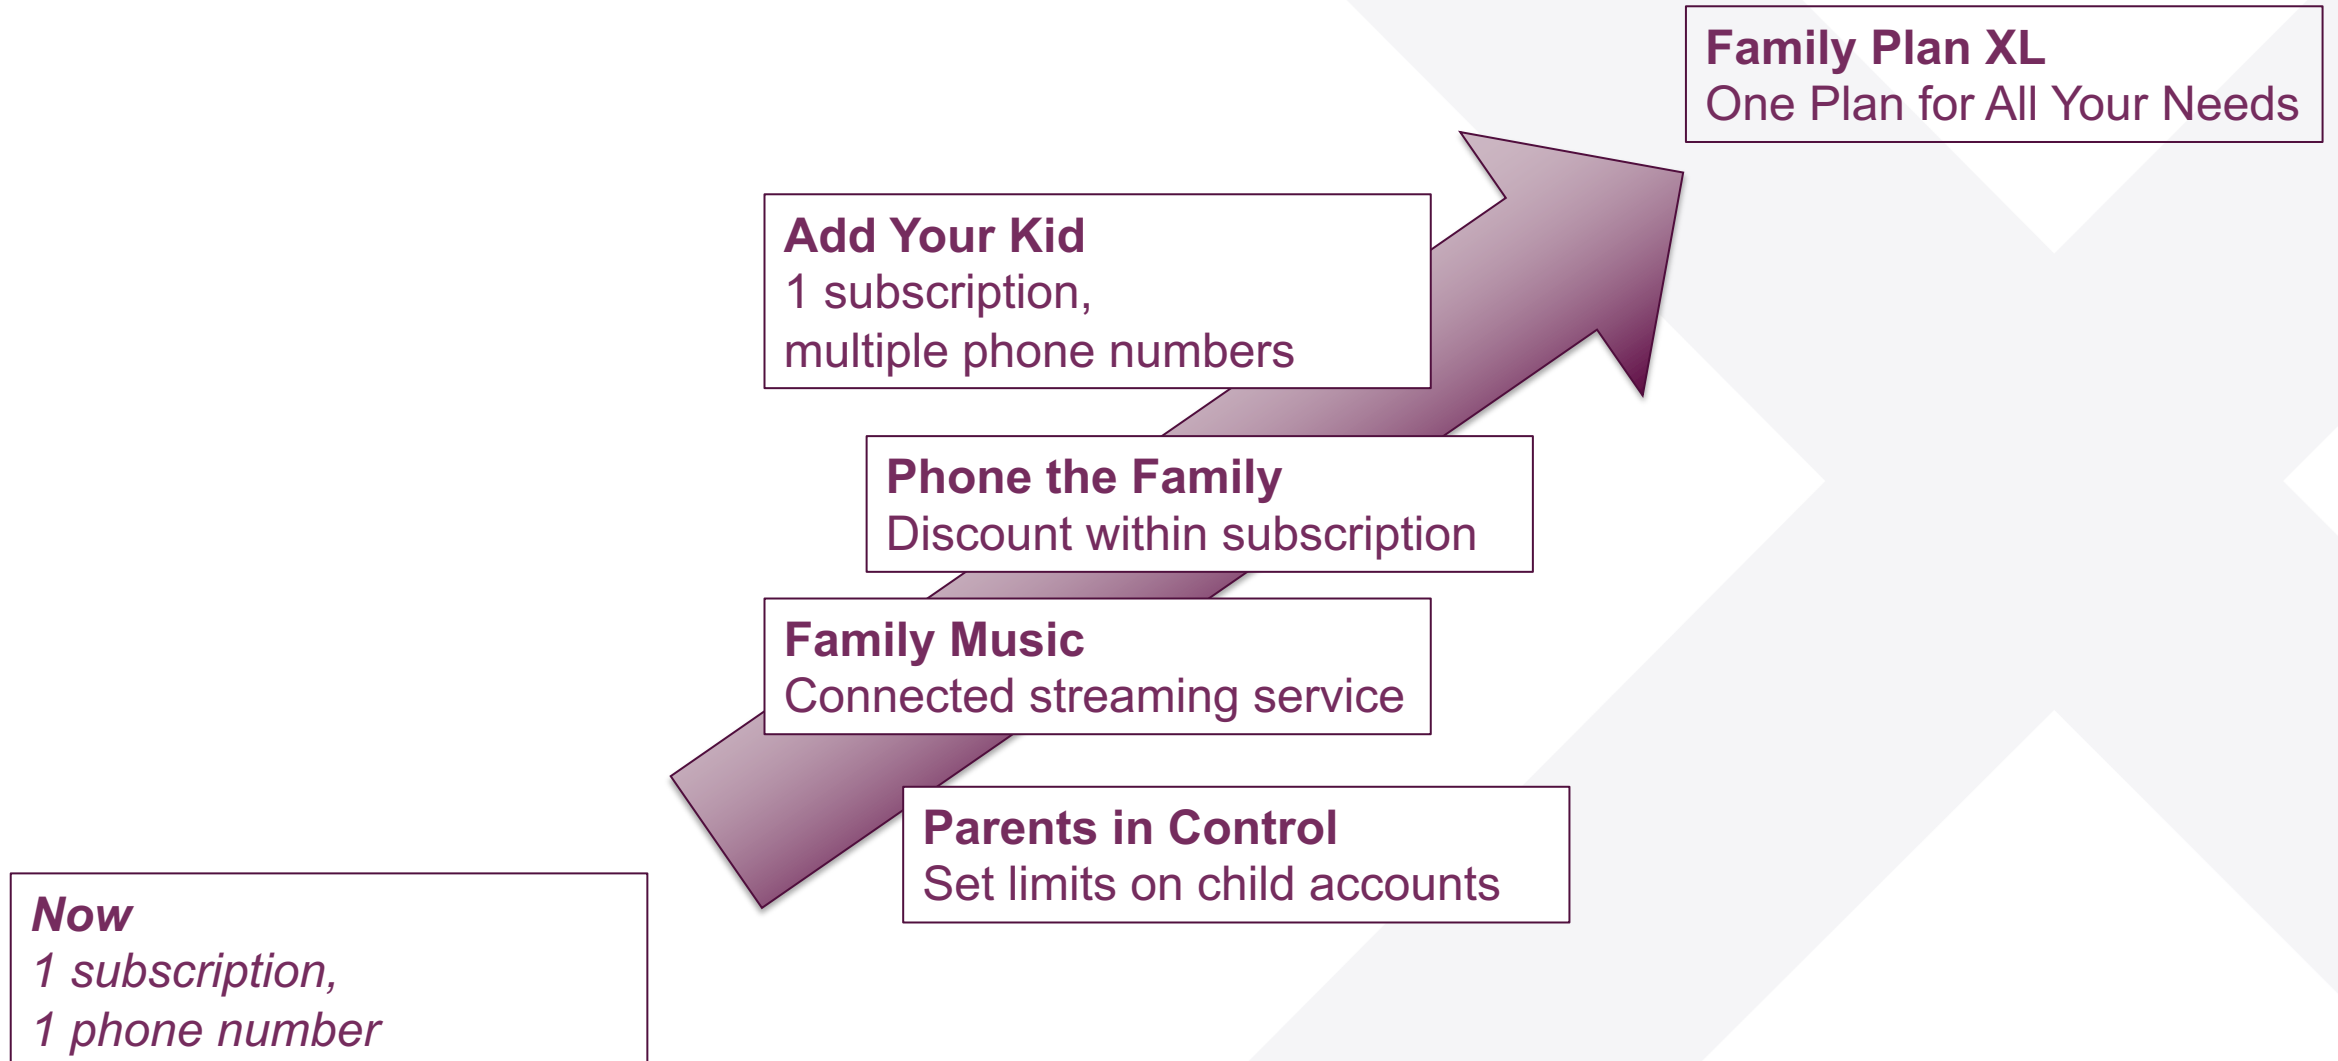

## Large goals are decomposed into smaller goals (not activities)

## A simple telco example

## Deliver end-to-end process slices

### Onboarding

Choose subscription	Choose Phone	Enter Personal Details	Accept and Pay	Provision Phone

#### Add Your Kid

1 subscription,  
multiple phone numbers

#### Parents in Control

Set limits on child accounts

#### Phone the Family

Discount within subscription

#### Family Music

Connected streaming service

# What is needed in each step to achieve the end-to-end goal?

**Add Your Kid**  
1 subscription,  
multiple phone numbers

## Onboarding

Choose subscription	Choose Phone	Enter Personal Details	Accept and Pay	Provision Phone
Choose existing subscription			Change existing subscription	Add number to subscription
Child Subscription				
Log in as current customer				

## We've created a Hierarchy of Goals

### > Family Plan XL

- Add Your Kid Plan
  - *Choose existing subscription*
  - *New Child Subscription Type*
  - *Log in as existing user*
  - *Change existing subscription*
  - *Add number to existing subscription*
- Parents in Control
  - ...
- Family Music
  - ...
- Phone the Family
  - ...

# **A Team of Teams is a Common Goal**

A team of teams is... a team!

# A simple telco example - two teams

## Onboarding

Choose subscription	Choose Phone	Enter Personal Details	Accept and Pay	Provision Phone

## Invoicing

Collect CDRs	Calculate Costs	Generate Invoices	Send Invoices

# What is needed in each step to achieve the end-to-end goal?

**Add Your Kid**  
1 subscription,  
multiple phone numbers

## Onboarding

Choose subscription	Choose Phone	Enter Personal Details	Accept and Pay	Provision Phone
Choose existing subscription			Change existing subscription	Add number to subscription
Child Subscription				
Log in as current customer				

## Invoicing

Collect CDRs	Calculate Costs	Generate Invoices	Send Invoices
		Add child costs to parent invoice	

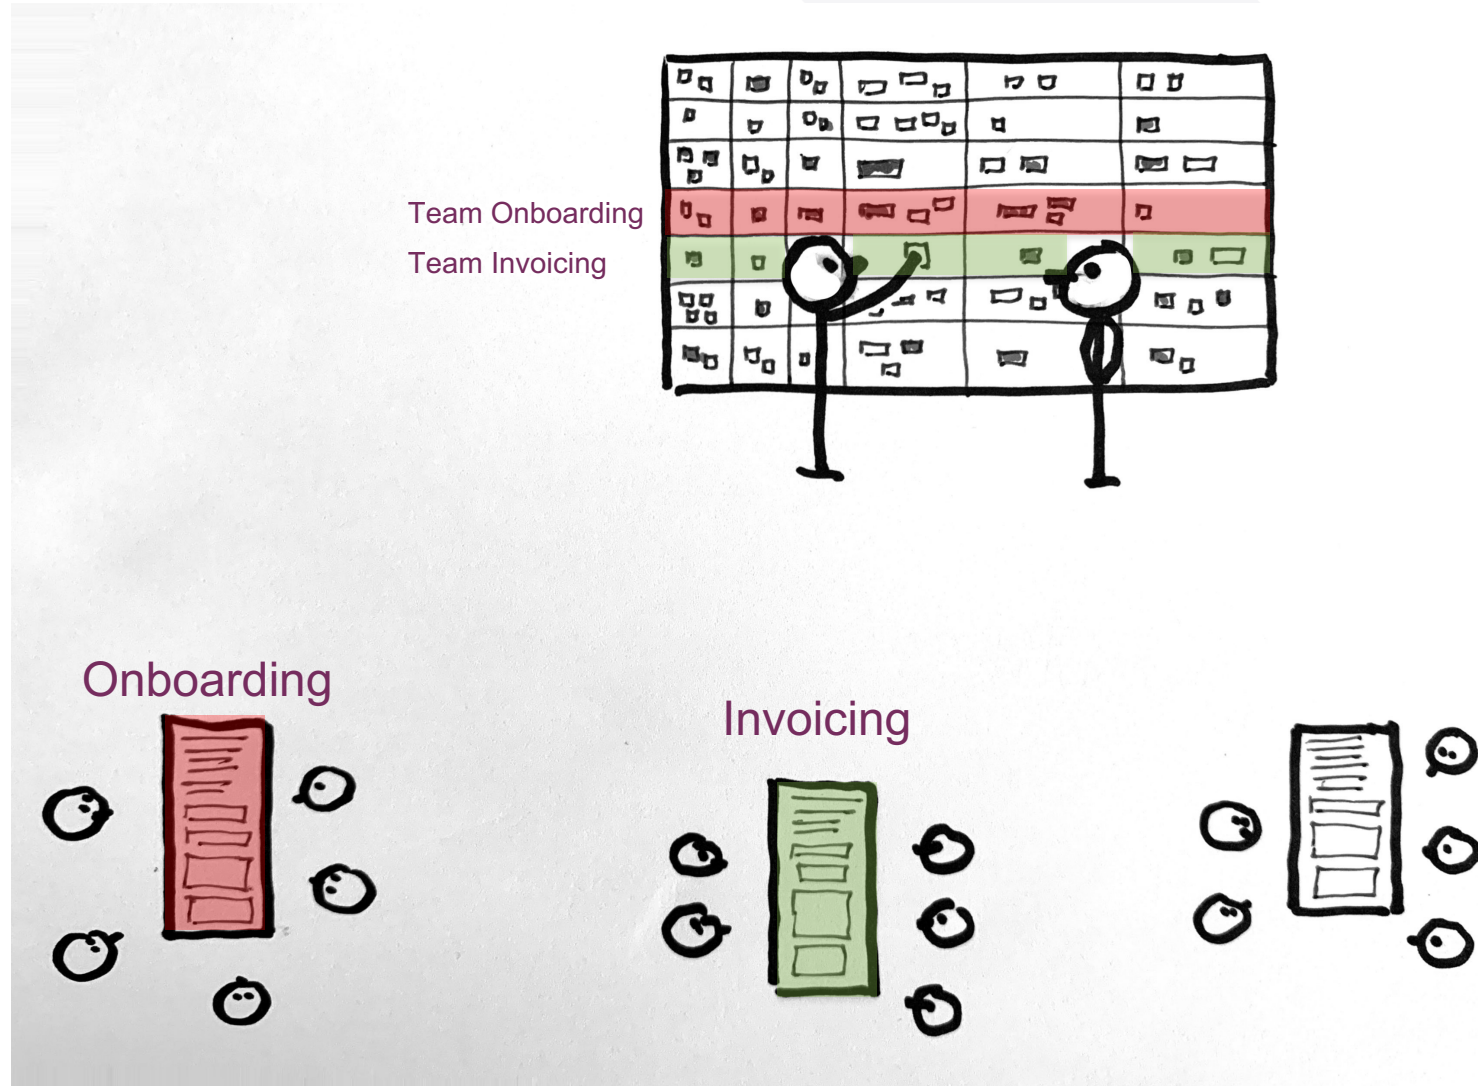

## We've created a Hierarchy of Goals

### > Family Plan XL

- Add Your Kid Plan
  - *Choose existing subscription (Onboarding)*
  - *New Child Subscription Type (Onboarding)*
  - *Log in as existing user (Onboarding)*
  - *Change existing subscription (Onboarding)*
  - *Add number to existing subscription (Onboarding)*
  - **Add child costs to parent invoice (Invoicing)**
- Parents in Control
  - ...
- Family Music
  - ...
- Phone the Family
  - ...

# Coordinate Product Backlogs with Big Room Planning

## Crowdsource your leadership with self-organization

# Coordination

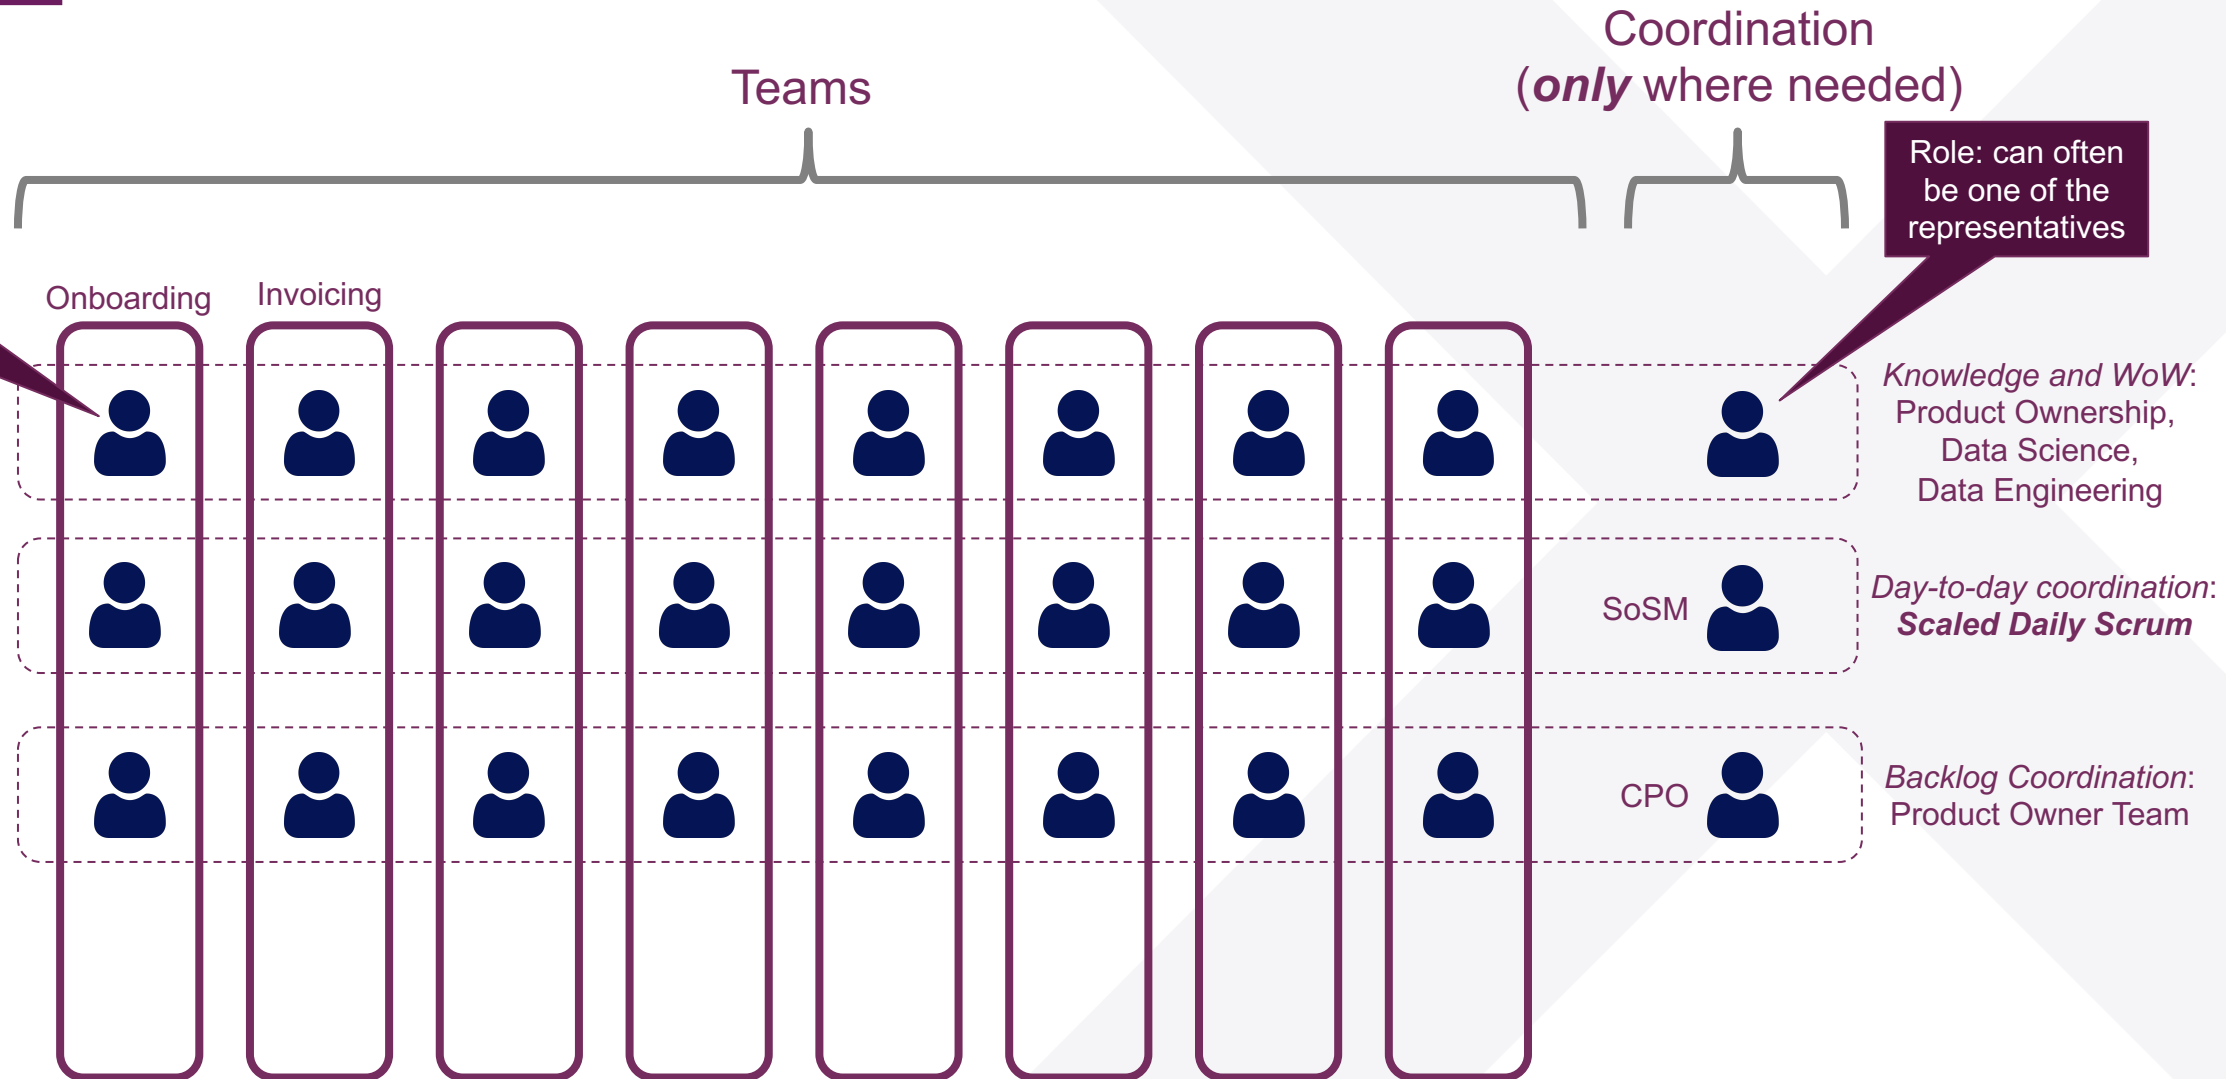

# Every meeting needs to be made explicit: can't rely on informal

Sprint Boundary Afternoon <ul style="list-style-type: none"> <li>- Review</li> <li>- Retrospective</li> <li>- Planning</li> </ul>		

# Personal Autonomy

# Hierarchy is not the problem, it's micro-management

Hierarchy as power relation

Hierarchy as part-whole relation

## Personal Autonomy in a remote situation

- Give trust: create a self-service environment
  - Clear sense of direction
  - Provide access to tools and information
  - Reward pro-activeness
  - Provide psychological safety. Fear is the great killer. *What would you do if you were not afraid?*
  
- Explicitly invest in social connection
  - Planned happy hours, coffee meetings (Slack Donut)
  - Do 1-on-1's often
  - See GitLab's allremote website

# Tools

## The big issue with tools is *licenses*

- Mural, Miro, Nureva Span all work fine
  - Mural somewhat better for moderators
  - Miro best online UX
  - Nureva Span best for touchscreens
- Zoom, Teams all work fine
  - Zoom better for trainers and webinars
  - Teams better for internal walk-in conferences
- Big Room Planning
