The IT Assessment That's Good For Business

# BUSINESS TECHNOLOGY ASSESSMENT

by ourCIO

*Most organizations are unsure of the state of their technology and what investments they should be making to get ahead.*

*We got you.*

## Your Business + ourCIO

Thoughtfully built for small to medium sized businesses, ourCIO's Business Technology Assessment provides organizations valuable insights on their use of technology—giving them answers to their questions (and those questions which they didn't know to ask).

Organizations benefit from having access to an experienced business technology executive who will provide trusted advice and guidance.

Organizations gain a clearer understanding of where they are at and a path forward for their business and technology.

**EXPERIENCED**  
**FULLY INDEPENDENT**  
**IMPARTIAL**  
**TRUSTED**

- How reliant is our organization on technology?
- What's the impact on our customers, operations, and revenue from an outage or cyber security incident?
- Are our systems, data and cyber security measures appropriate?
- Do we manage technology spend and budget accordingly?
- Is our technology driving our business goals, objectives and priorities?
- What do new and disruptive technologies mean to us?
- Are we working with the right technology suppliers, and could their performance be better?
- What are our gaps?
- What should we be doing about them?

Ultimately, is technology holding us back or driving us forward?

## What is included in ourCIO's Business Technology Assessment?

### Access to an experienced & knowledgeable business technology executive

Your organization gets access to the expertise and know-how of a senior technology executive experienced in leading technology effectively.

### A review of systems/ applications, suppliers & services

Key systems/applications, suppliers, and related agreements will be identified and reviewed to ensure appropriateness and cost effectiveness.

### A complete technology review

Your technology executive will walk through all the components of your technology environment to build a better understanding and identify potential shortcomings.

### A review of technology spend and budgets

Your technology executive will review your technology costs and any corresponding budgets, providing guidance on appropriate operating and capital spending.

### Interviews with key users, leadership and stakeholders

Your technology executive will conduct interviews with key personnel to gain different perspectives throughout the organization as to how technology is utilized.

### Best Practices and Comparative Benchmarking

Your technology executive will share insights and recommendations into best practices and leverage comparative benchmarking.

### Interviews with technology personnel

Key technology staff and providers will be interviewed to gain understanding and perspective on the technology environment, components and operations.

### Findings & Recommendations Report

Your organization will receive an easy to follow and actionable report highlighting findings and recommendations from the assessment. Your technology executive will walk you through the report to discuss the findings presented.
