

aucobo's Corona Features

aucobo offers an easy-to-use solution to keep your production running during the corona pandemic and to continue to digitize and optimize your processes afterwards. It helps you to control social distancing measures, track contacts in an emergency in compliance with data protection regulations and optimize direct communication decentrally.

FUNCTIONS

- Continuous distance monitoring
- Alarm signal, when distance is too low
- Events are stored and can be recalled if necessary
- Contact diary to identify contact persons in case of infection
- Walkie-Talkie Function
- Photo documentation
- Hand washing reminders

BENEFITS & ADDED VALUE

- Provides benefits even after the Corona crisis
- Secure protection of your data
- Quick and easy implementation
- Direct communication without direct contact
- Runs on Smartphones and Smartwatches
- Easily scalable

The **aucobo COVID-19 App** is compliant with data protection and can be installed on business and private devices.

Through absolute anonymization and individually adjustable and time controlled functions every user has the possibility to define if and when data will be shared.
