INTRODUCTION

AN OVERVIEW OF THE CURRENT MOBILE ESPORTS SCENE

The past two years has witnessed crucial developments in the global esports market, growing by 102% in revenues from 2015 to 2017. While mobile has quickly grown as the biggest gaming screen worldwide, its esports scene is largely lagging behind that of PC and console.

In Asia however, mobile esports is experiencing a boom, accelerated by the mobile-first culture of the region. The phenomenon is especially outstanding in China, leading with top franchises such as Tencent's Honor of Kings and Giant Network's Battle of Balls. In Asia, mobile esports is expected to follow a similar structure to that of PC, with the top games being played and scalable stadium events taking place with large viewership.

In the West, PC is still the dominant form of gaming entertainment and is expected to remain so for the coming years. Here, mobile esports is expected to be more successful in other layers of esports, such as the amateur scene.

For the mobile esports scene, 2018 will be a year to uncover its own identity within the larger esports ecosystem.

MARKET OVERVIEW

THE GLOBAL GAMES AND
ESPORTS MARKETS

“The arrival of the smartphone more than 10 years ago has not only created a \$50 billion dollar global business in game revenues but, equally important, has pioneered new business models and marketing mechanics that are impacting nearly every market and industry.

The success of competitive mobile games in general and esports activities is taking mobile gaming to the next level: all-round entertainment, more engaging than any other form.”

- Jelle Kooistra, Head of Market Analysts, Newzoo

PC ESPORTS VS. MOBILE ESPORTS

A DETAILED COMPARISON
ON DIFFERENT LAYERS

“Back in 2013, we were the first to report on esports as a trend that would reshape the media landscape on a truly global scale. It’s amazing to see where we are now, not only in terms of audience and live stadium events, but also the convergence of telecom, media, sports, and entertainment.

At the same time, the success of esports can never be evaluated without understanding the deeper consumer-driven trends that have pushed esports to where it is now.”

- Peter Warman, CEO & Co-Founder, Newzoo

ESPORTS IS THE PINNACLE OF COMPETITIVE GAMING

UNDERLYING SUCCESS OF COMPETITIVE GAMING HAS PUSHED IT TO A PROFESSIONAL LEVEL

CASE: PLAYERUNKNOWN'S BATTLEGROUNDS (PUBG)

PUBG rose quickly to become the most viewed game on Twitch and the first game to have more viewers than gamers.

- Up to 30% of game enthusiasts (depending on country) plays the game in an online competitive mode.
- Professional teams quickly added PUBG teams but...
- The game is far from being a solid esports title in multiple ways...

ESPORTS AS PINNACLE OF COMPETITIVE GAMING TREND

SHARE OF TOP 1,000 GAMES PER LAYER (INDICATIVE)

MOBILE ESPORTS MIGHT TAKE A DIFFERENT PATH

MOBILE COMPETITIVE TITLES SURGE BUT ITS ESPORTS ECOSYSTEM COULD PROVE TO BE DIFFERENT

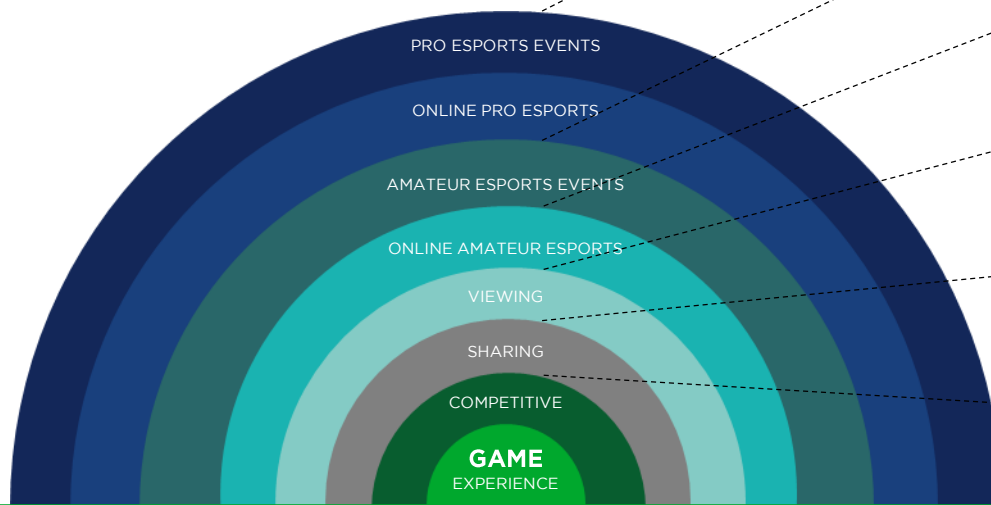

CASE: BATTLE OF BALLS

- Giant's Battle of Balls is already an esports success in China, and other Asian regions are soon to follow.
- The Battle of Balls Professional League (BPL) is the world's first casual mobile esports league.
- Giant E-Sports is part of the company's mobile esports ecosystem. It organizes events for franchises such as Battle of Balls, Vainglory, and Streetball in China.

ANALYSIS OF MOBILE ESPORTS OPPORTUNITY

- There is a market for pro esports events in Asia, but less so in the West. In Asia, esports around mobile games is more similar to PC, especially in Southeast Asia.
- Single player will not be enough for esports entertainment.
- Consumers and small organizations set up **events** at physical locations, for instance, fun community competitions.
- These events can be anywhere and anytime for mobile games, as there is no additional equipment required.
- Facilitating & stimulating the **creation of leagues and competition** between friends is key to both mobile and PC competitive games.
- Traditional esports is **viewed** most on mobile where there is no option to play. For mobile games, fans can immediately switch between playing and viewing.
- Performance on Twitch is a clear indication of esports potential. Mobile esports scores low viewership.
- Moments to **share** determine content creation.
- What these moments are determine if it is esports.
- Do the moments have to do with skills? Or fun or visual? Esports require skill-based moments.
- Mobile games can be equally **competitive** to PC and console games.
- F2P business model dominates both mobile and PC games. Mass audience required for competitive matching is represented on mobile.

MOBILE ESPORTS IN THE WEST

FACTS FEATURING CASE
STUDIES

MOBILE ESPORTS IN THE WEST

MOBILE ESPORTS SCENE LAGS BEHIND THAT OF PC & CONSOLE

PC is still the dominant form of gaming entertainment in the West and is expected to remain so for the coming years. While mobile has quickly grown as the biggest gaming screen worldwide, its esports scene still lags behind that of PC as well as console.

COMPETITIVE games are the core of mobile esports in the West. Top mobile esports franchises in the West include Clash Royale, Vainglory, and Summoners War, which fall into the genres of multiplayer strategy, mobile MOBA, and MMO, respectively.

MULTI-GAME events are catching the eye of big organizers and investors in the West. In the East, a typical multi-game event involves top mobile games of a single publisher. In the West, however, events with games from different publishers are common. Amazon organized Mobile Masters tournaments in 2017 in which various games were played, including Vainglory, Hearthstone, World of Tanks Blitz, etc.

CLASH ROYALE & SUMMONERS WAR

CLASH ROYALE
LAUNCH DATE: JANUARY 2016
PUBLISHER: SUPERCCELL
HQ: HELSINKI, FINLAND

Clash Royale is one of the most played mobile games in the West. Supercell has started developing the game's esports scene with several initiatives including its Crown Championship, Clash Royale's top-level esports event. The game has now grown to be the #1 mobile esports title in the West by viewership hours on Twitch; in 2017, all Clash Royale tournaments and leagues generated totally **1.3 million viewership hours**.

CASE STUDY: CLASH ROYALE

ITS OPEN PLAY MODE ATTRACTED MILLIONS OF PLAYERS TO PARTICIPATE FROM ALL OVER THE WORLD

Clash Royale's PvP mode, together with its tournament feature, creates a highly competitive scene for the game. Social bonds are established by the clan system and connections to external social platforms. In 2016, Supercell introduced a live spectating feature that allows players to invite friends to watch a battle. These features have pushed up Clash Royale's retention rate and gradually moved the game into an esports scene. As of December 2017, the game had over 50 million DAU globally.

Clash Royale's global esports competition The Crown Championship has an open-play mode that allows any players at Level 8 or higher to participate by organizing online, open-battle, custom tournaments that are directly available in the Clash Royale app. The 2017 Crown Championship attracted 27.4 million global participants. Shortlisted players from Bracket Play and Elimination phases can take part in the spring/fall finals and the world finals.

The Crown Championship is a global event. The Spring Split 2017 was launched in North America, Europe, Latin America, China, South Korea, and Japan. The Fall Split 2017 was further expanded to Southeast Asia and the rest of the world. The World Finals was held in London on December 3rd, 2017 and attracted players and audiences from all over the world.

In Q4 2017, all Clash Royale live streaming videos accumulated 15.8 million viewership hours on YouTube Gaming and 6.3 million on Twitch. It was the #1 mobile game on Twitch and YouTube Gaming combined by viewership hours. Noticeably, Clash Royale was the only title in the top 20 viewed games that had much more viewership hours on YouTube Gaming than on Twitch.

MOBILE ESPORTS IN ASIA

FACTS FEATURING CASE
STUDIES

MOBILE ESPORTS IN ASIA

CHINA IS THE WORLD'S LARGEST MOBILE ESPORTS MARKET

MOBILE esports is more popular in the East than in the West, especially in China, accelerated by the mobile-first culture of the region. In Asia, mobile esports is expected to follow a similar structure to that of PC, with the top mobile games being played and large stadium events taking place with large viewership.

CASUAL mobile games hold a strong position in the esports scene in Asia, which is different from the West where competitive genres dominate the market. Giant Network's Battle of Balls Professional League was the world's first casual mobile esports league and its 2017 Global Final will be the first mobile esports event held in Mercedes-Benz Arena Shanghai, the former exhibition hall of World Expo 2010.

SOCIAL functions are largely adopted in mobile games in Asia, creating strong bonds between gamers. In China, for example, all of Tencent's mobile games can be connected to either QQ or WeChat where gamers can easily access the leaderboards and any updates of the games they are playing via the embedded game centers. Gamers can also play with/against their friends by using the social system.

CASE STUDY: BATTLE OF BALLS IN CHINA

IT'S NOT ONLY A GAME BUT A WELL-ESTABLISHED BRAND

Battle of Balls features casual gameplay as well as intense antagonism. Players can play against each other as individuals or team up with other players. There is strong interactivity in the game logics, which matches the casualness of current gaming trend. The game integrates great sociability for heavy game players at the same time. Battle of Balls had 25 million DAU in China as of January 2017.

Battle of Balls adopts a point system that is similar to the ATP rankings in tennis. Teams earn points by winning various tournaments. Top teams are qualified to higher level tournaments and leagues.

Battle of Balls has established itself as a brand, or IP, in China, partnering with companies across various industries. Battle of Balls sportswear and accessories were introduced by New Era and G-Shock in China. A field marketing campaign was carried out with the leading beverage group Uni-President in China, and in return, Uni-President became a sponsor of Battle of Balls leagues.

Battle of Balls has revolutionized the casual mobile esports scene by organizing large stadium events that have attracted live audiences in the thousands. Licensed live streaming platforms in China actively broadcast Battle of Balls esports content, which has accumulated millions of viewership hours in total.

CASE STUDY: GIANT E-SPORTS

A MOBILE ESPORTS BRAND OF GIANT NETWORK

Driven by the accelerated growth of mobile esports in China, Giant Network set up Giant E-Sports as a separate mobile esports division to further establish the ecosystem around some of the company's core mobile titles, including Battle of Balls, Vainglory, and Streetball.

On top of the success of Battle of Balls as an esports franchise in China, Giant E-Sports also partners with Alisports, a leading third-party esports event organizer in China under the Alibaba Group, to further optimize the event systems and esports content.

At the same time, Giant E-Sports is mapping out its global expansion. Battle of Balls is already a popular mobile title in Asian countries and regions such as South Korea, Taiwan, and Hong Kong. Organizing local tournaments in these regions is on Giant E-Sports' roadmap.

GIANT E-SPORTS

PARTNER

Giant has been the local publisher of Super Evil Megacorp's mobile MOBA Vainglory in China since November 2015. In 2017, China contributed 20% of the game's revenues on iOS, becoming the second largest grossing market of Vainglory after the U.S.

Together with Super Evil Megacorp, Giant E-Sports has brought Vainglory esports to China by organizing Vainglory8 China Spring, Summer, and Fall Split and Vainglory China League (VCL) in 2017.

Streetball is a 3v3 mobile basketball game published by Giant in November 2016. Only one year after its official launch in China, it has become a selected franchise in the China Mobile E-Sports Games, a nationwide mobile esports event organized by General Administration of Sport of China.

On top of that, Giant E-Sports has organized several tournaments for Streetball, including Streetball Online Tournament, Streetball Asia Tournament, and Streetball Global Finals.

FUTURE OUTLOOK

SCENARIOS IN THE WEST
AND THE EAST

THE FUTURE OF MOBILE ESPORTS

HOW IT WILL EVOLVE IN THE WEST AND THE EAST

GAMES MARKET REVENUES IN THE WEST

PER SEGMENT | NAM & EU | 2017

In the West, competitive games are expected to continue their dominant status in the esports scene. However, due to a currently low viewership and a relatively underdeveloped esports ecosystem in the West, mobile esports is more likely to be successful in the amateur scene in the near future, which explains why Supercell's open-play mode in the Crown Championship was such a hit.

GAMES MARKET REVENUES IN ASIA

PER SEGMENT | 2017

Driven by the mobile-first culture in Asia, mobile esports is expected to continue its growth in the region. With top Chinese franchises expanding to other Asian countries and Tencent's partner Sea Group holding a leading position in the Southeast Asian games market, we also expect the coming few years to see a boom in the mobile esports market in countries such as Japan, Thailand, Indonesia, and Vietnam

A FURTHER LOOK INTO MOBILE-FIRST ASIA

CHINA IS LEADING THE MARKET AND INDIA IS TO FOLLOW

China will continue its leading position in the global mobile esports market. With the support from the government, the market is expected to flourish with an increasing number of scalable stadium events with large viewership and prize money. More non-competitive titles will establish their positions in the mobile esports scene thanks to the casualness of the latest gaming trend. Mobile esports in China is expected to follow a similar structure to PC that top franchises will gradually grow to well-established brands and build their unique ecosystems. Meanwhile, the success in mobile esports will further drive the development of mobile game streaming platforms in China.

ACTIVE MOBILE DEVICES

INDIA & U.S. | NOVEMBER 2017

339M

Actively used mobile devices

304M

Actively used mobile devices
in the U.S., November 2017

Mobile esports in India is expected to develop rapidly in the coming few years, driven by the exponential growth in the mobile market and mobile games section in the country. India has grown to the world's second-largest mobile market by number of active devices, and from 2017 to 2020, the global mobile games market is expected see the fastest growth coming from India. The Indian mobile games market is forecast to grow by 240% from 2017 to 2020 and to become the world's fourth-largest mobile games market by 2020. The development of the mobile esports scene in India is expected to be similar to that in China, with competitive and casual titles both being actively involved.
