

# Fund Update

for the quarter ended 30 June 2018

## Kiwi Wealth Master Trust - Kiwi Wealth Growth Fund

This fund update was first made publicly available on 27 July 2018

### What is the purpose of this update?

This document tells you how the Kiwi Wealth Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Kiwi Investment Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

The fund provides investors with access to an actively managed diversified portfolio of primarily global assets. The investment objective is to outperform the MSCI All Country World Index, 50% hedged to the New Zealand dollar over the medium to longer term. The fund invests primarily in growth assets.

Total value of the fund	\$859,564,849
The date the fund started	01/01/2016

### What are the risks of investing?

Risk indicator for the Kiwi Wealth Growth Fund:<sup>1</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.sorted.org.nz/tools/investor-kickstarter>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

The principal types of risks applying to the fund that could affect an investment and the fund's returns are the risks associated with the:

- assets in which the fund invests;
- active investment management of the fund;
- performance of other parties involved in the fund, or with whom a contract is entered into on behalf of the fund; and
- rules applying to the fund changing.

Other than circumstances that are already reflected in the risk indicator, the Manager is not aware of any circumstances that exist (or are likely to arise) that significantly increase the risk to returns for investors.

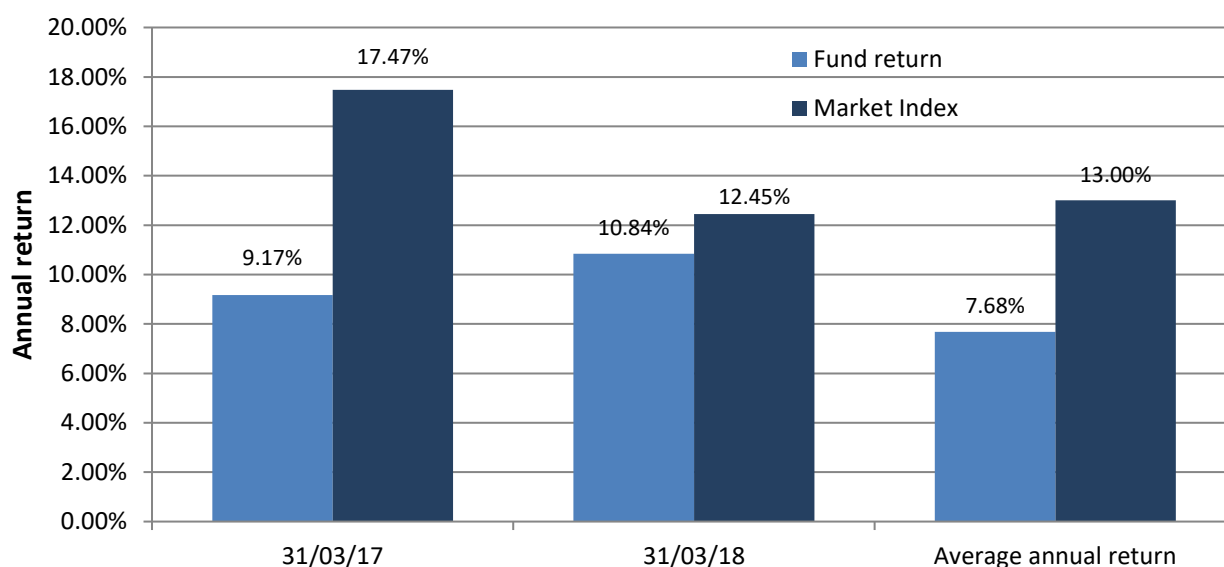

### How has the fund performed?

	Past year
<b>Annual return</b> <i>(after deductions for charges and tax)</i>	13.80%
<b>Annual return</b> <i>(after deductions for charges but before tax)</i>	14.40%
Market index annual return <i>(reflects no deduction for charges and tax)</i>	16.39%

The market index return is the strategic asset allocation weighted benchmark index return based on the MSCI All Country World Index. Additional information about the market index is available in the Statement of Investment Policy and Objectives on the Disclose register at:

<http://www.companiesoffice.govt.nz/disclose>.

### Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2018.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

Note that market indices reflect no deduction for charges and tax.

### What fees are investors charged?

Investors in the Kiwi Wealth Growth Fund are charged fund charges. In the year to 31 March 2018 these were:

	% of net asset value
<b>Total fund charges</b>	<b>0.17%<sup>2</sup></b>
<i>Which are made up of -</i>	
<b>Total management and administration charges</b>	<b>0.17%</b>
<i>Including -</i>	
Manager's basic fee	0.00%
Other management and administration charges	0.17%
<b>Total performance-based fees</b>	<b>0.00%</b>
	Dollar amount per investor
<b>Other charges</b>	<b>\$0.00</b>

Investors are not charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds).

Small differences in fees and charges can have a big impact on your investment over the long term.

### Example of how this applies to an investor

Alice had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Alice received a return after fund charges were deducted of \$1,380 (that is 13.80% of her initial \$10,000). Alice also paid \$0.00 in other charges. This gives Alice a total return after tax of \$1,380 for the year.

### What does the fund invest in?

This shows the types of assets that the fund invests in.<sup>3</sup>

#### Actual investment mix

### Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

Cash and cash equivalents	0.00%
New Zealand fixed interest	0.00%
International fixed interest	0.00%
Australasian equities	0.00%
International equities	100.00%
Listed property	0.00%
Unlisted property	0.00%
Commodities	0.00%
Other	0.00%

### Top 10 investments

	Name	Country	Type	Credit rating (if applicable)	Percentage of fund net assets
1	Westpac NZ Dollar Account	New Zealand	Cash and cash equivalents	AA-	2.95%
2	GMO Systematic Global Macro Trust	Australia	Other		2.57%

## Further information

You can also obtain this information from the Manager using the contact details below.

## Notes

1. Market index returns as well as the fund's actual returns have been used to fill in the risk indicator, as this fund has not yet been in operation for five years. Market index returns have been used from 31 January 2013 until 31 December 2015 and actual returns after that. As a result of those returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. The total fund fee calculated for the purposes of this disclosure statement is materially different to how total fund fees are charged to an individual investor due to the period of time the fund has been in existence, resulting in significantly below average account balances in the fund.
3. Other is comprised of alternative investments: investments that fall outside the main asset classes and can include absolute return funds and commodity investments.
