

PowerMate®

Elevator: Complete Moving Solution ...

1. Horizontal Support Brackets

6. Strap Bar***

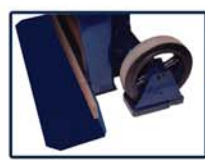

2. Skid Plate

5. Load Elevator

3. Wheel Brakes*

4. Extended Toeplate Depth

Accessory Package Includes:

1. Horizontal Support Brackets - Designed to protect the battery pack and for easy loading & unloading. Provides the ability to place the machine and load horizontally in the vehicle during transport, e.g. van.

2. Skid Plate - Designed to facilitate ease of loading & unloading. Provides a solid flat surface for securing and positioning the load in the optimal position.

3. Brakes* - Gives the operator more leverage! Provides safety when operating the machine and load, giving the operator full control of the load at all times.

4. Extended Toe Plate - Ensures load is safe and supported at all times from the bottom.

5. Load Elevator - Motors have low centers of gravity, the load elevator changes the fulcrum and makes the load easier to manoeuvre, substantially reducing operator effort.

6. Extra Strapbar** - A third strapbar required to secure heavy or tall loads.

Additional Accessory Options Available:

7. **Big Wheel Attachment** - Ease of movement across rough uneven terrain, long distances, and roof tops.

8. **Cylinder Attachment** - Safely secures cylindrical loads like generators and armatures to the machine.

9. **Battery Charger** - Plugs into wall outlet to charge your machine when not in use. (Also available - IVCS (In vehicle charging system), hardwired or lighter plug-in)

10. **Platform** - Designed to facilitate easy loading and unloading in & out vans.
