

**COVID-19 Response:**

# Secure, Simply Deployed Network for Remote Workers

## We're Here to Help Provide Secure, Reliable LTE Connectivity for At-Home and Mobile Employees

### Complete, Rapid-Deploy Emergency Network Solution

Enterprise-Class Wireless Router

Centralized Management

Comprehensive Security Features

24x7 Support

An unprecedented number of people are working from their homes today. In response to the COVID-19 pandemic, employees are using their home networks and consumer security solutions while competing with household members for bandwidth. This puts company data and assets at risk — creating a situation where IT teams are unable to centrally manage and maintain security policies.

Organizations that have employees working from home or other remote locations need all-in-one pop-up wireless network solutions that feature:

- Immediate shipping
- Rapid, zero-IT deployment
- Enterprise-class LTE with multi-carrier flexibility
- Wi-Fi and Ethernet connectivity
- Enterprise-class security capabilities
- Centralized management for faster deployment and troubleshooting

# Everything You Need in One Solution

It's easy to get your employees connected and protected. Select your best fit based on your form factor, security and bandwidth needs and we'll do the rest. Within 24 hours, your employee will have everything they need to connect over the network.

- Streamlined ordering process with rapid shipping to your location in the field
- SIM can be included (US only)
- All accessories, including cellular and Wi-Fi antennas
- Optional battery power (IBR600C only)
- Router registered with NetCloud, enabling zero-touch installation with no need for on-site IT support
- 24x7 customer support available when you need it

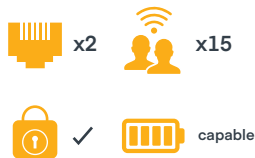

IBR600C

**Enterprise class hotspot supports up to 15 Wi-Fi and 2 Ethernet devices. Ideal for connecting via VPN or through cloud-hosted security solutions such as Zscaler.**

## Enterprise Hotspot

Compact | Secure | Cloud-Managed

Router is included in a 3-year NetCloud Plan

AER2200-1200M
