REINVENTING THE BOX™

Modular Security Systems Incorporated (MSSI) is leading the way to a more secure world, one turnstile at a time. The company's patented Modular Access Control (MAC) Portal is a standard, practical, sturdy structure made from industrial grade materials.

Unused, but not useless. While some businesses are built on thinking outside the box, MSSI's business is built on reinventing the box; that is, taking what others see as a single-use container and reconfiguring it and giving it multiple, pragmatic purposes for contractors the world over. By cutting openings in the container, installing full-height turnstiles, proximity card readers, and state-of-the-art, client-specified access control technology, suddenly, by leveraging the power of MSSI ingenuity, the box nobody wanted is transformed into a high-tech gateway capable of generating mustering reports, preventing tool theft, as well as tracking worker time and tying it to payroll records. The Patented MAC Portal can also be custom built utilizing a variety of other building materials. The MAC Portal installs quickly and easily, and because its shape is a standard container size, MSSI can transport the MAC Portal anywhere a semi-truck or cargo ship can go.

MAC PORTALS WITH OR WITHOUT GUARD HOUSES

Standard MODULAR ACCESS CONTROL (MAC) Portals can be configured to accommodate a wide range of floor plans with from one to ten individual turnstile lanes, access control technology, and the option for a guard house, depending on your site-specific needs. The guard houses in these units are climate controlled, include overhead lighting, counter space, electrical outlets, and CAT-5/6 communications connections.

FEATURES

- Patented
- Interior/Exterior Lighting
- Customizable Floor Plans
- Full- or Half-Height Security Turnstiles
- Optional Access Control Technology/Hardware
- High Security Solid Steel Doors
- Can be Integrated with Access Control Systems

BENEFITS

- Portable/Relocatable access control turnstile helps lower your total construction costs
- Eliminating fraudulent timekeeping results in a significant payroll cost savings
- Turnkey guard office to help control contractor access to job site
- Helps mitigate tool theft at the job site
- Custom options provide contractors with flexibility to adapt to a wide range of floor plans
- Optional security & compliance software technology helps reduce administrative costs
- Portable solution is ideal for an adaptable worksite versus the logistics required for a permanent house.

VAC PORTALS WITH OR WITHOUT GUARD HOUSES

Much like the MAC Portal, standard VEHICLE ACCESS CONTROL (VAC) Portals can be configured to accommodate a wide range of floor plans and standard options. The guard houses in these units are climate controlled, include overhead lighting, counter space, electrical outlets, and CAT-5/6 communications connections. The VAC comes complete with guard house, barrier arms, and a base that is built to be delivered and offloaded as one unit. Simply connect the VAC to power and it is operational.

FEATURES

- Patented
- All-in-One portable guard office with vehicle barrier arms and access control
- Portable Vehicle Access Control without a guard office
- Custom options including solar power available
- Comes with push button open and close installed

BENEFITS

- Site-to-Site portability gives contractors optimum flexibility
- Wide range of sizes
- Provides instant security at critical sites
- Save time and money compared to stick-built structures
- Reduces vehicle access at the job site
- No construction required

CUSTOM GUARD HOUSES

The portable turnkey guard houses from MSSI are custom-designed to give your security staff protection from the elements. Fully climate-controlled with insulation, HVAC units, interior and exterior lighting, including windows in various designs, these portable guard houses come in a variety of sizes from 6' x 8', 8' x 10', and 8' x 20' (as seen above).

FEATURES

- Standard and custom floor plans available
- Sturdy, Heavy Duty Construction to withstand multiple relocations throughout the life of the product
- Temporary, semi-permanent, or permanent installations
- Fully climate-controlled setup allows for the installation of access control technology, telephone, and computer/internet connection

BENEFITS

- Great for cold weather climates
- Delivered turnkey, plug-and-play, ready to operate
- Certified stamped engineered drawings provided upon request at additional cost
- No onsite construction required
- Modular, easily relocated
