

Software Developer

Rainton Bridge Business Park, Sunderland, North East, England, UK

Who we are

WorkCast are a rapidly growing technology company based in the North East UK and Seattle USA. We create a world leading webinar and virtual event platform used by major organisations including Sony, Elsevier, Wiley, Springer Nature, Barclays and Standard Life. Our outstanding product and amazing team make webinars and online events a far richer and more accessible experience for attendees and remove the barriers for Marketers to run and benefit from webinars.

What we offer

We provide a fun environment with many company social activities, competitive salary, an excellent pension scheme, life assurance, and 25 day holidays plus bank holidays. We provide free snacks, drinks, fruit and breakfast. You get free access to Perkbox (Employee happiness benefits scheme) with a huge amount of savings available plus free parking and if you like gaming we also have a video game area to play over lunch and breaks.

As a Software Developer, you will

- Be involved in rapidly changing, cutting edge technologies
- Write high quality code, adhering to best practices and standards, within an Agile team environment
- Conduct reviews of existing systems and processes to ensure we're always performing to our best capacity
- Share your knowledge and experience with the team
- Contribute to the overall success of the team and get involved in all aspects of meeting business and customer expectations
- Be highly motivated, professional and work well under pressure in a small team
- Be willing to self develop, learning new areas where the business requires

What we're looking for

- Substantial commercial programming experience in C#, .Net, Webforms, MVC, JavaScript, jQuery, and Ajax
- Commercial experience of MS SQL Server
- n-Tier development experience
- A degree in a software engineering (or similar) subject

Advantageous

- Media Encoding and Streaming
- WOWZA and/or ffmpeg experience
- Amazon Web Services (AWS)

Why WorkCast

- Using the latest versions of Visual Studio and .NET
- The opportunity to gain Microsoft and AWS certifications
- Our platform is fully in the cloud at AWS so you'll have the chance to gain cutting edge skills in a rapidly changing landscape
- Working with cutting edge technologies which are different to the normal boring day to day grind. Some unique technologies based around media streaming and consumption
- Platform built to scale and perform for a vast global audience
- Offices in Sunderland, Edinburgh and Seattle
- Free refreshments, treats, quarterly nights out, and away days
