Space Defined With Collaboration in Mind

As open-plan environments become increasingly common, organizations need ways to create definition between spaces with different functions. The evolving workplace, with an intensified focus on collaboration, requires flexibility for impromptu gatherings and structure for focused teamwork. Post and Beam lets organizations define distinct areas within large spaces, creating varying degrees of boundary to support teams.

Integrated Space Definition

With its integrated modular power system, Post and Beam supports technology and open sightlines with a clean and uncluttered aesthetic, while Premium Whiteboard Infill and easy-to-access power support both analog and digital tools, making collaboration simple.

Compatible with Duo storage and available with fabric in-fill, Post and Beam creates and defines spaces while providing a desired feeling of personal, shielded space, offering workers the materials they need, on-site and within reach.

SUSTAINABILITY

At its heart, sustainability at Steelcase is about people. It's about creating and supporting the economic, environmental and social conditions that allow people and communities to reach their full potential.

Research and insights direct our path. It's not only about creating goods, it's about creating good. It's not only about creating value, it's about living our values. It's not just about reducing our footprint, it's about expanding our reach. It's about creating lasting and meaningful change to enable the long-term wellbeing of current and future generations.

Innovative products and solutions result. In the development of our products, we work to consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life. We demonstrate performance through third-party verified certifications and voluntary product declarations.

Steelcase's sustainability promises, actions, and results are communicated in an annual Corporate Sustainability Report.
