

# Docker & Kubernetes Workshops

## Containers, Microservices and DevOps

CloudOps provides hands-on workshops to help your team better understand the Docker and Kubernetes ecosystems, as well as the challenge of adopting DevOps practices including CI/CD. Save time and get up to speed on the business value and technical know-how of these concepts and tools in just a few days.

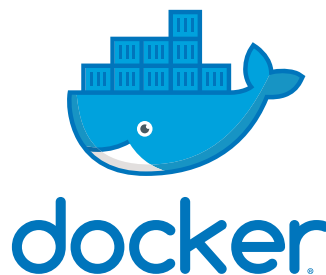

### Who should attend?

- Developers
- Operators
- DevOps practitioners
- Technical decision makers

### Why attend?

- Get started on Kubernetes in development and production
- If you already use containers, deepen your knowledge of the technologies, tools and day 2 operations
- Gain a better understanding of the complex container ecosystem

Three day Docker and Kubernetes workshop with hands-on labs

### About us

CloudOps is a cloud consulting and services company focused on open source, cloud platforms and networking. We help businesses thrive in a data driven software economy with successful adoption and operation of cloud platforms, enabling self-service, utility economics and API-automated, continuous delivery of IT.
