

CloudOps Services

CloudOps is a cloud consulting, delivery, and services company focused on open source, cloud platforms, networking and DevOps to transform, support and evolve cloud native practices.

What does CloudOps do?

- Facilitates move to the cloud and DevOps adoption
- Strategic partnerships with:
 - » public clouds (including Amazon Web Services, Microsoft Azure, and Google Cloud)
 - » on-premises private cloud solutions (such as RedHat OpenStack, Apache CloudStack, and VMWare)
 - » Canadian regional cloud (cloud.ca)
 - » Best-of-breed technology partners
- CloudOps' experts understand business and technical goals of each customer
- Designs, builds, and executes a successful cloud strategy with a mix of open source software, partner tools, and our own automation practices

What is DevOps and how does it relate to cloud?

- The combination of cultural philosophies, practices, and tools that increases an organization's ability to deliver applications and services at high velocity
- Evolve and improve products at a faster pace than traditional software development and infrastructure processes
- Development and operations teams should work closely together to increase efficiency and time to market for applications running in the cloud
- Deploy and deliver your applications in the cloud via a DevOps pipeline and application platform

How does CloudOps help organizations become DevOps-ready and move to the cloud?

- Customer journeys typically begin via:
 - » a hands-on workshop, or
 - » an assessment of current technology stack and desired outcomes
- Results can lead to professional services (PS) and/or 24 x 7 SOC 2 managed or augmented tier 2/3 support services
- CloudOps can:
 - » build a customer's application platform, and ensure knowledge transfer so that their own DevOps team can successfully operate it, or
 - » build, operate, and fully support the application platform for them so they can focus on their code

CloudOps promises to:

"Git" you there faster!

Best time to value with our expertise and automation
