

M-iQ Turnkey Solutions

MTS-918

18' 8-3/8" (5700mm) overall

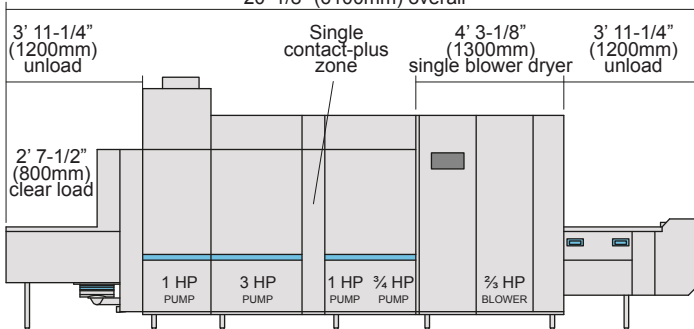

MEIKO's newest M-iQ fits small footprints while adding typical efficiencies of other M-iQs: heat recovery, blower dryer and high efficiency - available in steam or electric heat

The MTS-918 is useful for extremely tight spaces without sacrificing cleaning power

MTS-1

20' 1/8" (6100mm) overall

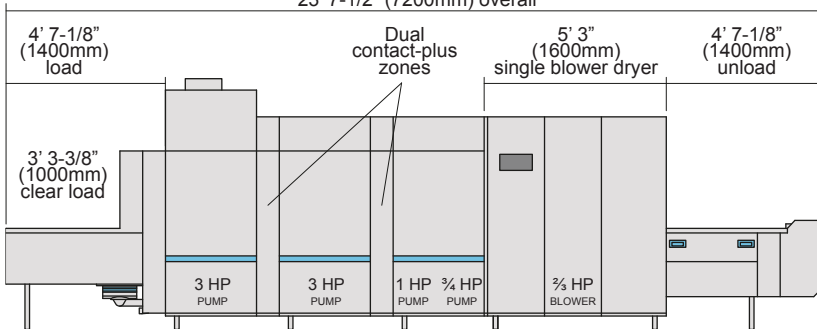

This M-iQ configuration works best for trayless cafeterias or kitchens with limited length available - ready to be installed with electric or steam heat

It is approximately one foot shorter than previous MTS-1 configuration with same superior performance as before

MTS-2

23' 7-1/2" (7200mm) overall

The MTS-2 is suited for kitchens and cafeterias with large numbers of trays and sheet pans, like in hospitals or universities and comes with steam or electric heat, depending on the project

MEIKO gives superior drying capability compared to the previous MTS-2, with same machine length

MTS-3

Please contact MEIKO or your local MEIKO Dealer for more information regarding custom configurations and options available through the MTS program.
