

DISCOVER THE POSSIBILITIES OF ASSET TRACKING WITH LOSANT

Use cases and opportunities are infinite. Asset trackers can prevent theft, monitor high-priced inventory or be used to provide teams with real-time information. The benefits to every business and organization are clear. Stakeholders and customers expect access to real-time information. Location tracking with mobile apps or simple devices are no longer enough to compete.

Losant is a hardware-agnostic enterprise IoT platform designed to work with your existing connectivity partner. Our partner network features several hardware and connectivity organizations for enterprises breaking into IoT. Our team of solutions engineers would be happy to help you create an IoT system that will work for your business.

Respond to situations immediately. Mitigate risks. Reduce loss.

Better serve your clients or your leadership team by creating new opportunities with asset tracking capabilities.

POTENTIAL USE CASES

- Delivery confirmation
- Asset/load condition monitoring (vibration, temperature, moisture)
- Integration with new and existing devices and data sources
- Real-time tracking
- Configurable workflows and dashboards
- End-user applications, alerts and domains

LOSANT ENTERPRISE IoT PLATFORM TEAM: WHAT WE BELIEVE

Losant is a progressive product team composed of software engineers, solutions engineers, and automation specialists. Together, we produce superior technology for enterprise IoT solutions. We believe in continuous improvement and work toward our vision of an ever-connected world. As we adapt to our changing environment and add features to our IoT cloud platform, we consider usability, flexibility, reliability, and security to promote ease of use for our customers.

KNOW MORE

Integrate information systems.

Many apps can track location. Get a complete picture of an asset's condition with the Losant Enterprise IoT Platform. Our tools can incorporate data from new and existing devices and sources. Do you know if a shipment is at risk? Is your fleet in its best condition? To better serve your customers, or to provide information for new business opportunities, Losant can enable you to incorporate real-time delivery information with geographical location, load weight, vibration information, and possible maintenance requirements.

SEE MORE

Visualize real-time data from anywhere.

Create GPS maps, time logs, graphs, and more to provide real-time information, and peace of mind to your team or customer with Losant's Data Visualization. Our platform is designed to meet ever-changing business needs and can be configured for different clients or scenarios. The applications are endless. Save your organization time by tracking the location of limited equipment and save replacement costs. Prevent threats or view new opportunities.

OFFER MORE

Give your client or your leadership team what it wants.

Deliver real-time information to help empower decisions. Customize information using our Experience Views feature. Design applications, dashboards, messaging alerts or email reports to your leadership team or your client. Greatly reduce time to market, eliminate operational overhead and simplify your development team's workload with our easy drag and drop interface. Make sense of millions of data points to provide a scalable solution with Losant's IoT platform.

LOSANT PROVIDES THE TOOLS YOU NEED TO SUCCEED

The Losant Enterprise IoT Platform is an application enablement platform which allows enterprises to effectively build applications and create solutions that securely scale to millions of devices. All of Losant's components, from Edge Compute to End-User Experiences, work seamlessly together to transform real-time data from connected and non-connected devices into tailored IoT solutions.
