*The ticker service is limited to the listed company's own securities and has a maximum polling rate of 5 updates per minute.

Proximity Hosting

NGM offers the possibility to host equipment in the same collocations as NGM. Clients can contact the collocation providers themselves and arrange for proximity or NGM can host client equipment, including basic maintenance (power cycling of equipment) and connectivity to NGM market servers. Contact NGM Support if you are interested in this option.

Special Services

NGM can help clients with special requests, such as setting up special solutions for provisioning of data. You are welcome to contact us with your requests, and we will see if we are able to provide you with a solution.

Off hours support rates

Basic support during the NGM market opening hours is included in the rates specified for the different services above. NGM can also assist customers outside of business hours, including weekends, but then an hourly fee is charged. Off hours support should always be booked in advance with the NGM Support.

Service	Rate
Support service, off hours	2600 SEK / commenced hour

Unless the service commences immediately after normal support hours, the minimum charge for off hours support is 2 hours (5200) SEK.
