Enterprise Healthcare Reporting Migration

The Client is a leading provider in healthcare software services giving solutions and services to thousands of facilities around the globe, including 40 percent of all large Integrated Delivery Networks, and 33 percent of U.S. hospitals. Project was a migration project that required migration of SQL 2000 Reporting to SQL 2005 Server.

Challenges

e-Zest responsibility was to help project with the migration of SQL 2000 reporting to SQL 2005 server reporting Services by converting existing reports with advanced SSRS features.

Solution

e-Zest technical team demonstrated high capabilities in development of web programming and web server control using ASP.NET applications. Team used IIS for authorization of reports and had demonstrated expertise in web server administration in Microsoft Internet Information Server 6.0. The new SSRS feature of SQL Server 2005 was used for generating reports.

Technology

Presentation Layer	HTML, DHTML, JavaScript
Presentation Logic	ASP.NET with C# code behind
Business Logic	C#
Data Access Layer	ADO.NET

Conclusion

e-Zest team had demonstrated high capabilities in adapting to new technologies like SSRS packages in SQL Server 2005 to meet client's specific business drivers.
