Feeding and Management

Blueprint[®] Southeast Range Mineral is formulated to be self-fed to beef cattle on pasture. **Blueprint[®] Southeast Range Mineral** contains BioPlex[®] and Sel-Plex[®] organic minerals to help support overall performance and help your cattle attain maximum genetic potential.

Mature beef cattle should consume an average of 4 ounces per head per day. Provide one covered mineral feeder for every 20 to 30 animals. Locate each mineral feeder near a clean, fresh source of water. Mineral consumption levels will vary depending upon the mineral status of the animals. Provide fresh, clean water to all animals at all times.

For additional information, please contact your Blueprint[®] representative.

CAUTION: Use as directed. Consumption of selenium should not exceed 3 mg per head per day.

WARNING: This product, which contains added copper, should not be fed to sheep or any species that have a low tolerance to supplemental copper.

BioPlex[®] and Sel-Plex[®] are registered trademarks of Alltech
