ONE VISION.
STRONG PARTNERS.

TOGETHER FOR 100% RENEWABLES

ONE VISION. STRONG PARTNERS.

TOGETHER FOR 100% RENEWABLE ENERGY.

Every Fronius Solutions Partner Plus (FSP+) shares our vision for 24 hours of sun - a world powered by 100% renewable energy. Together with Fronius, FSPs+ are expediting this vision to become the energy suppliers of the future, improving levels of system quality, performance, and reliability throughout the industry. FSPs+ are hand-picked by us because they offer the plus standard in service and support, holding customer satisfaction in the highest esteem. Our exclusive FSP+ network of installers has a proven track record in providing Flexible, Reliable, and Optimised solar systems: from choosing the best products for your needs today to outstanding after-sales service, to future-proofing your solar system for the demands of tomorrow. An FSP+ is the certified quality provider you've been looking for.

OUTSTANDING EXPERIENCE WITH FRONIUS PRODUCTS

/ Every FSP+ has a proven track record in installing and servicing Fronius. They are selected to become FSPs+ based on their experience, expertise, and passion for quality excellence. With their extensive knowledge, they can suggest the best options and tailor the perfect solar solution to your needs.

HIGH-LEVEL TECHNICAL TRAINING FROM FRONIUS

/ FSPs+ are required to undertake regular, intensive training delivered by top Fronius technical experts. This training ensures they have the best current product, and best practice knowledge so that your system is tailored to you and installed to last.

HIGHEST QUALITY & INNOVATION

/ Fronius believes in quality partnerships, and we actively seek out partners that align with our vision for quality and innovation. Fronius has carefully selected every FSP+ because they have a proven track record in offering the highest level of quality service, product choice, and support to their customers.

PROACTIVE CUSTOMER SOLUTIONS

/ The Fronius Solar.web online platform and its integrated monitoring tools enable FSPs+ to keep a close eye on your system. FSPs+ can, therefore, detect any issues and take preventative action before you are even aware of any problem. Every FSP+ has a proven track record in setting up Solar.web monitoring and providing proactive solutions for its customers.

FASTEST SERVICE & TECHNICAL SUPPORT

/ As a quality provider, Fronius takes pride in providing reliable and high-quality products. While we subject all our products to extensive endurance testing to ensure consistently high standards, faults are inevitable from time-to-time. In that case, we have FSPs+, tried-and-tested Fronius experts able to replace faulty parts and entire devices on site. This means they do not need to remove the inverter for warranty claims, keeping the downtime of your photovoltaic system to a minimum. To ensure every FSP+ can provide you with the best possible service, we give them expert support. Every FSP+ has priority access to qualified technicians from our Technical Support Team, and with the Fronius Solar Online Support (SOS) Tool, FSP+ partners have critical diagnostic information at their fingertips.

INFINITE ENERGY. CUSTOMISED SOLUTIONS.

CASE STUDY

Western Australian homeowner, Kevin, recently had a 15.12kW solar system installed at his newly built 6 bedroom, 3 bathroom home, situated along the river in Applecross. The system is significantly larger than most residential systems and was carefully designed to accommodate for the high energy usage of the household.

Kevin and his wife have always seen the benefits of solar power for both electricity cost savings, and the environmental benefits. After careful consideration of the various solar companies they received quotes from, Infinite Energy were chosen by the client due to their knowledge, professionalism and product selection.

The 15kW system Infinite Energy installed consists of a Fronius Symo 15.03-3M inverter and 42 x 360W SunPower solar panels, as well as a Fronius Smart Meter. The advanced Fronius monitoring means the homeowners can track their energy consumption against their production, allowing them to make educated choices on when and how they consume energy. The impressive system will generate over 23,742kWh of clean energy every year, covering the majority of the daytime electricity expenses for the household.

Infinite Energy consultant, Neil, designed the system, taking the layout, shading and orientation of the roof into consideration while also tailoring to their high-energy needs.

“The Fronius Symo 15.03-3M inverter was selected for this particular install due to its exceptional reliability and durability in supporting energy-intensive households. The Fronius range offers an outstanding monitoring portal, allowing users to better understand their systems’ production and their energy consumption, which ultimately leads to more savings.”

“In addition to this, Fronius inverters are built utilising state-of-the-art Austrian technology, and with Infinite Energy being a Fronius Solutions Partner Plus we could offer the customer a full 10-year parts and labour warranty. This gave the client peace of mind that they were making a smart investment and receiving the highest quality products for their home. The system can also be future battery-ready thanks to the design of the existing Fronius software, making the addition of battery storage later on a quick and seamless process.”

The homeowners were pleased with the excellent service provided by Infinite Energy and found the entire process smooth and hassle-free. The system has provided both exceptional savings for the household and greater energy independence.

SITE CHALLENGES:

- / Large site with high energy consumption
- / Home owners in and out at different hours making for unusual consumption pattern
- / Significant capacity required

FRONIUS SOLUTIONS:

- / Reliability and large capacity inverter
- / Monitoring capabilities to optimise usage habits
- / 15 kW single inverter installed allowing us to minimise space required

SYSTEM DATA	PERTH, AUSTRALIA
Size of installation	15.12 kW
System type	Residential roof mounted
Inverters	Fronius Symo 15.03-3M
Further products	Fronius Smart Meter
Commissioned	July 27, 2018
Annual yield	23,742 kWh
CO ₂ savings / year	19 tonnes
Self consumption rate	72%
Estimated savings	\$3,000 P.A.

FSP+ FRONIUS TESTIMONIAL

Keshia Noronho
Managing Director,
Fronius Australia.

**SHARED VISION FOR A
WORLD POWERED BY
RENEWABLES**

"Infinite Energy are considered a leading solar installer in Australia in both commercial and residential installations. They have partnered with Fronius for many years and have since become one of our most trusted and successful Fronius installers.

Infinite Energy strives to help Australian homes and businesses by providing reliable, quality solar systems that work seamlessly for better energy management and savings. Through their ongoing commitment to quality and excellence, Infinite Energy have shown they are aligned with Fronius's strong values of innovation and improving the customer experience.

Infinite Energy has demonstrated:

- / Highest quality solar expertise
- / Excellent customer service
- / Quality installations
- / Long history using Fronius products
- / Industry thought leadership
- / High moral standards for both their staff and customers

Infinite Energy is one of our most trusted providers, and I am proud to recommend them as an official Fronius Solutions Partner Plus."

Keshia Noronho,
Managing Director Fronius Australia.
