

Increase your patient retention and engagement with BYOD

Data-driven and digitally-enabled trials

- Achieve up to **77% costs savings** with BYOD
- **Accelerate** patient recruitment and enrollment
- Deploy **45% faster** with Medable BYOD

BYOD for:

- Telemedicine
- Remote Patient Monitoring
- Wearables
- mHealth
- ePRO
- eCOA
- eConsent

Connecting patient, sites and sponsors – in real time with BYOD

For patients

Connect patients to trials with iOS, Android and wearables.

For sites

Enable site staff to screen, enroll, enter and view patient data.

For data management

View real-time patient data and leverage next-generation analytics.

Full visibility into your BYOD deployment.

With real-time dashboards, sponsors & CRO's can access information around:

- Device activation status
- Device type
- Days since last used
- Enrollment status
- Software version
- Encryption status

Rapid configuration & deployment

24x7 Helpdesk for patients in any language

Accelerated patient enrollment

BYOD advantages for Patients

30% Cost of eCOA solutions for the supply of provisioned devices.

Increased adherence and retention:

- Patient is familiar and comfortable with device
- Patient is MORE likely to carry their own device

Increased engagement:

- Patient is less concerned about putting sensitive medical and/or personal information on device as they use their own device
- Increased connectivity as patient is more likely to choose a device that works in specific geographic location
- Patient is more likely to be compliant with study diaries and/or questionnaires
- Notifications & reminders

Medable and Penn Bariatric drive research success leveraging BYOD

Increased patient engagement | Accelerated FPI | Reduced cost of operations

Why MEDABLE?

1M+
patients

1K
