PORTABLE CHEMICAL LABS BY DROPBOX INC.

At DropBox Inc. we design, engineer, and manufacture custom containerized solutions that are portable from one jobsite to the next for temporary use or for permanent installations. Working directly with our customers we have been able to develop creative solutions for projects in every industry setting in the U.S. and around the world.

In the realm of that creative thinking DropBox Inc. has developed a custom, containerized, portable solution for customers in the chemical industry. Our portable chemical labs can be used as temporary solutions for chemical testing and analyzing or act as a permanent addition to any facility. With multiple floor plans available DropBox Inc. can provide the right chemical lab regardless of our jobsite and the nature of your business.
